

Councilman Scott Benson's Staff

Yours in service,

Scott R. Benson

3rd District City Councilman

"My mission is to enhance the quality of life in District 3."

**CITY OF DETROIT
DISTRICT 3**

The postcard features a large, stylized signature of "Scott R. Benson" in black ink. To the left of the signature is a circular logo containing a large blue number "3". The logo is surrounded by the text "COUNCILMAN SCOTT R. BENSON" and "3RD DISTRICT DETROIT". A red checkmark is placed over the "3" in the logo. Below the signature and logo is a quote in quotes. At the bottom of the card is a map of the City of Detroit showing the boundaries of the 3rd District. The map includes street names like Cass, Gratiot, Kelly, Schenck, Outer Drive, 7 Mile, Ryan, Center, Mt Elliott, Nichols, Van Dyke, Carpenter, Davison, and John R. It also shows the Detroit River and the 15 highway. The 3rd District is shaded in purple.

Letter from the Councilman

Dear Third District Residents,

Thank you for my reelection and for allowing me to lead and serve as your council member for another four years. We made it through another year in a pandemic and the winter. As summer fades and fall emerges, I do not want us to forget the loved ones we've lost, but to remember them with fond memories and look forward to our future. Although we seem to have normalized our lives, COVID is still active in Detroit. Therefore, please continue to practice proper safety protocols, get vaccinated and booster shots, and wear a mask in public indoor settings.

As we move into fall, I want to inform you of a few new priorities for our office:

1. We are working on a new restaurant grading ordinance to ensure that food establishments serve safe food to our residents. We never want to see another situation where diseases such as Hepatitis A or rat infested coney dogs are sold to the residents of Detroit. This ordinance will ensure transparency, an educated consumer and that restaurants prioritize safe food handling processes.
2. I have established the Wealth Generation Task Force (WGTF), which will bring together a group of individuals to develop and deliver ten implementable policy recommendations to the mayor's office by 31 December 2022. The goal will be to grow Detroit's middle class by moving Detroiters out of poverty, retaining our current middle class, and attracting middle-class individuals/families to Detroit from around the country. To become a competitive and financially sustainable city, Detroit must grow its middle class, and the WGTF will help to achieve this goal.
3. As a direct result of my advocacy and American Recovery Plan Act funds, the 3rd District will see a new gymnasium at Farwell Recreation Center and a refresh of the existing tennis courts. We have also completed a mural project to recognize the lives we lost to COVID and several of our community leaders that have gone on to glory.

Again, I thank you for allowing me to serve as your Detroit City Councilman, and I look forward to our continued growth and prosperity.

Green Task Force Update

DETROIT CITY COUNCIL
GREEN
TASKFORCE

The image consists of three photographs documenting a drive-thru COVID-19 testing procedure. The leftmost photo shows a person in a green jacket standing by a red car, holding a clipboard and pen, likely a healthcare worker. The middle photo shows a person in a dark jacket and face mask standing near a white van, possibly a medical vehicle. The rightmost, largest photo is a close-up of a smiling man with a beard and sunglasses, wearing a blue jacket with 'Blue Cross Complete' and 'Michigan' logos. He is leaning against a white van door, with another person visible inside the van's open driver-side door.

<p>The role of the Green Task Force is to advise the Detroit City Council on green principles and practices to serve the City of Detroit better. The Green Task Force comprises numerous environmental advocacy groups, nonprofit organizations, ecological businesses, government employees, and residents. The Green Task Force works to create green jobs, improve environmental policy, and build a more sustainable city.</p> <p>The task force comprises various committees representing many topics critical to supporting a healthier Detroit. Sub-committees</p>	<p>include Water, Renewable Energy, Energy Waste Reduction, Climate Action, Organics Recycling, and Recycling & Waste Reduction.</p> <p>This year, the Green Task Force is working on a policy to make it easier to install solar panels at residences. We are also working on a watershed plan for Detroit's east side. This plan will allow the city of Detroit to receive grant funding for preventing flooding in our neighborhoods. The Green Task Force has created an event guide manual for recycling for significant events held in Detroit. This guide will provide tips and procedures for handling recycling on a large scale.</p>	<h2>Food Grading Ordinance Overview</h2> <p>The proposed changes to Chapter 19 of the 2019 Detroit City Code, Food Article II City License for Food Service Establishments and Vending Machines posting requirement are:</p> <p>All signs will have the date issued. ---	--	---	---	--	--

Food Grading Ordinance Overview

- If an establishment is inspected and placed in the enforcement process, a YELLLOW sign will be issued which will contain the words “inspected and enforcement process”
- If the establishment is closed as a result of the inspection a RED sign will be issued that will contain the words “closed by order of the Detroit Health Department”

- The proposed changes to Chapter 19 of the 2019 Detroit City Code, Food Article II City License for Food Service Establishments and Vending Machines posting requirement are:
 - All signs will have the date issued. The sign shall be no smaller than 7x9 inches and must be posted in:
 - (A) The front window of establishment
 - (B) In a display case mounted on outside front wall within 5ft of front door and not less than 4ft from the floor.
 - (C) Or, Posted in a location determined by the department.
 - If an establishment has been inspected and is in compliance – a GREEN sign will be issued.
 - If the food establishment has been inspected, but has uncorrected priority or priority foundation violations, the department will not issue a sign and will remove the green sign from the prior inspection.

ars and gave out over 3000 masks and 1000 sanitizing units. Throughout the pandemic, our office has supplied PPE to District 3 residents and ensured the community is equipped to stay healthy and safe. Although health restrictions and guidance are constantly changing, PPE and vaccination remain the resources that protect a person's physical well-being most.

partnered with the City's Health Department and held several drive-thrus for residents to receive a wellness bag conveniently and safely in their car. These bags were filled with hand sanitizer, KN-95 masks, sanitizing wipes, and a COVID-19 home test kit. The drive-thru was held outside our District Office, at the Matrix Center. Over two days and eight hours, we received nearly 500

PPPE stands for Personal Protective Equipment and has seemingly become a habitual acronym in our vocabulary during the pandemic. PPPE is one crucial way to stop the coronavirus spread and keep families safe as they work on the frontlines during the COVID-19 pandemic.

FAQ: Detroit Home Repair Fund

I submitted my HOPE application, called the hotline, and met all the requirements. What comes next?

If you have taken all the required steps and meet the eligibility requirements, a community partner will reach out when they are able with next steps.

If a resident's HOPE approval has rolled over from 2021 to 2022 due to age/disability, do they have to take any additional action?

If residents are on the carry forward list, or have already applied to the 2022 HOPE, they do not need to re-apply to HOPE to meet the DHRF requirements.

Is there an actual application for the program that I need to complete?

By calling the hotline, speaking with an operator, and completing your 2022 HOPE application, you are completing all the required steps for the Detroit Home Repair Program. There is not an "application" in the traditional sense. By calling into the hotline and completing your 2022 HOPE application, you are putting yourself in the best position possible for home repairs.

Will I be notified if I am approved or denied?

A community partner will reach out to you when they are able to take you on as a repair client. At this time, you will not be receiving an "approved" or "denied" letter. Because this is a new program, we are unable to say when you will be hearing from a community partner.

What if I have an emergency repair?

DHRF is not an emergency home repair program. If you have emergency repairs, please seek other options.

What will this program actually repair? My roof? Porch? Etc.

The program will fund a variety of home repair needs, potentially including roofs, porches and other repairs that prioritize health and safety. The program will not fund cosmetic repairs or upgrades to an outdated, but functional kitchen or bathrooms.

Do you need to have homeowners' insurance to qualify for the DHRF?

No, you do not.

When will repairs begin?

Community partners are expected to begin repairs in late summer of 2022, but we do not have a timeframe for the completion of individual repairs.

Annual Hats, Scarves, and Gloves Event

Detroit Councilman Scott Benson partnered with local, civic, and corporate leaders to donate winter coats to children in Council District Three. Last year marked the 8th anniversary of our annual winter clothing drive. To further promote education, we also gave away ten touch screen laptops to students at Fisher Lower Academy. The laptops were donated by Human-i-T.

If you would like to participate with the annual coat drive this year please call our office at 313-224-1198. New donations only, please.

Welcome to Councilman Benson's District Office team, which consists of Damian Mitchell and me, Terry Catchings. We are excited to make sure you are updated with beneficial resources and services to help improve your quality of life. You can reach us from 10am to 6pm on weekdays, Monday – Friday by calling 313.530.0587.

The secret of change is to focus your energy on the building the new instead of fighting the old.

Regards,

Terry Catchings, District Chief

Suppose a family receiving a donated computer does not have internet access or needs internet. In that case, human-i-T uses a 4-pillar approach to helping citizens acquire computer devices and internet access, as well as with tech support and training. While it will take several months before the donated city computers will be ready for distribution, families in need of a computer can get on a list to receive one from human-i-T from its existing inventory.

Residents of Detroit who would like access to low-cost computers, laptops, and tablets, or help getting reduced-rate broadband internet, or tech support or training can call 888-391-7249 or visit human-i-T.org.

between the City and nonprofit human-i-T. The donation of more than 500 decommissioned city computers are part of the City's larger strategy for bridging Detroit's digital divide through its partners at Connect313.

The City has delivered half of the computers today, and the remainder is expected in the coming weeks. All 500 computers first will be wiped of any existing and sensitive data. Most will be refurbished to be provided to Detroit families lacking access to technology by human-i-T and its community partners. Devices that are damaged or too old to be refurbished will be disposed of in an environmentally sensitive manner.

"Our longstanding commitment to digital equity is realized through our partnerships," said Detroit's Director of Digital Inclusion, Joshua Edmonds. "This initiative will allow us to positively impact the environment across Detroit for decades."

Residents of Detroit who would like access to low-cost computers, laptops, and tablets, or help getting reduced-rate broadband internet, or tech support or training can call 888-391-7249 or visit human-i-T.org.

that blight remediation is transformative in making Detroit the beautiful city that residents deserve. "We are working around the clock to make sure there is visible change for Detroiters," said Katrina Crawley, Assistant Director, Blight Remediation, City of Detroit General Services Department. "By doing this work we increase awareness about the actions the City is taking to reduce blight for the health, safety and dignity of Detroiters."

In the last four months, the blight remediation teams have completed remediations on 427 properties on 14 corridors around the city.

Hundreds of City government computers recently replaced with newer models will be completely refurbished and distributed for free to Detroit families in need of technology and access to the Internet, thanks to a partnership

Part of Partnership with human-i-T to provide accessible technology to lower-income Detroit residents to bridge the City's digital divide

appearance of properties throughout the City. The City is empowered by law to clean up blighted property when a blight ticket has been issued and the violations have not been corrected by the property owner. The cost of remediation is then added to the blight ticket fines and fees. Remediation invoices can range from several hundred dollars up to tens of thousands. The blight remediation team is simultaneously addressing city-owned properties while holding private owners accountable for dilapidated structures that have added to negative impacts across Detroit for decades.

The City is remediating, on average, twenty-six properties a week. Blight to Beauty is grounded in a belief that residents deserve a healthy environment. The City of Detroit Blight Czar, Katrina Crawley, Esq., is tasked with ensuring
