Section 1 - Introduction

The City of Detroit requests approval of a renewal of five Neighborhood Revitalization Strategy Areas (NRSA), as defined by the Department of Housing and Urban Development (HUD) Notice CPD-16-16. The intent of the NRSA is to target Community Development Block Grant (CDBG) resources and leverage them with additional resources to further comprehensive community revitalization efforts.

According to a HUD publication that can be found on the HUD Exchange, “Basically CDBG,” Chapter 10, Section 10.2 states that “communities with approved NRSA are offered enhanced flexibility in undertaking economic development, housing, and public service activities with their CDBG funds.” To address the housing and community development needs, goals, and objectives, it is the type of innovative programs, comprehensive approaches, and level of flexibility that the NRSA provide that is the impetus for renewal of the NRSA designation.

1.1 2015-2019 NRSA

In 2015, the City of Detroit received HUD’s approval for the designation of five (5) target areas in the City of Detroit as NRSA. At the time the City was undergoing a post-bankruptcy restructuring and was in severe economic distress including an inability to retain residents due to a lack of capital that was flexible enough for home repair. The NRSA Plan was considered one of the most strategic options to focus federal resources geographically and leverage private capital for home repair, increased public services, and economic development primarily for the benefit of the City’s low- and moderate-income population.

1.2 Case for NRSA Renewal

Since 2015, the Duggan administration has generated enthusiasm for the public and private sector to work in unprecedented ways to restore neighborhood stability and create jobs for Detroit residents. By investing our limited resources more wisely and strategically targeting federal funds within the framework of the NRSA Plan, the City will continue to provide opportunities to increase the numbers of residents and business owners served and achieve higher leverage of private capital. The NRSA strategy along with housing and economic development strategies and other factors resulted in improved conditions in the NRSA. Despite the resurgence of the City’s downtown, slum and blighted conditions, declining and undervalued properties, and a high poverty rate in the neighborhoods makes a case to continue the use of the NRSA Plan. In addition, private sector investment in the City’s neighborhoods has increased through several public and private sector partnerships. Several stakeholders in the City including the Detroit Land Bank Authority (DLBA), Detroit Economic Growth Corporation (DEGC), foundations, financial institutions, community-based organizations, and private businesses are investing in the restoration and revitalization of the City’s neighborhoods.

1.3 2020-2024 NRSA

The City has developed its FY 2020-2024 Consolidated Plan and wishes to renew the NRSA designation, as allowed under CPD Notice 16-16, to continue the comprehensive revitalization of its neighborhoods. The NRSA plan is designed to include strategies that are intended to build market confidence in Detroit neighborhoods by stabilizing housing stock, increasing home values, growing small businesses, preparing our youth for future employment, and building wealth for Detroit families. The NRSA tool provides greater flexibility and ease of use of CDBG funds and allows the City to serve a broader base of residents and business owners than would otherwise be eligible. The strategy comprises several interrelated initiatives.

Using the original 2015 – 2019 NRSA boundaries as a starting point, the City used the most up-to-date demographic data that was provided by HUD and other local data sources and found that there were adjustments to the original NRSA boundaries that needed to be reflected in the 2020-2024 NRSA Plan. Block groups that qualified in the last NRSA Plan no longer qualify due to a shift in population and/or Area Median Income (AMI) and block groups that were not previously eligible now qualify. The shift in the NRSA boundaries suggests improvement in neighborhood improvement outcomes and gives the City the ability to serve more residents.

In addition to the updated demographic data supplied by HUD, the City took new qualified block groups and expanded the NRSA boundaries to reflect initiatives that the City plans on undertaking over the next five (5) years. These include overlapping NRSA boundaries with investment areas such as:

- Strategic Fund Neighborhood Fund (SNF) – An aggressive strategic plan that was created from input from residents, stakeholders and City staff to fund neighborhood improvements to a total of ten (10) areas within the City. These improvements include park improvements, streetscape improvements, commercial corridor improvements, and affordable single-family home stabilization. It is expected that these projects will leverage approximately \$1 billion in investment in Detroit.
- Affordable Housing Leverage Fund (AHLF) – Program in partnership with the City of Detroit, Local Initiatives Support Corporation (LISC) – Detroit Office, and Michigan State Housing Development Authority (MSHDA) that supports the creation and maintenance of affordable housing initiatives throughout neighborhoods in the City of Detroit. The total amount proposed to be invested by these three agencies amounts to \$250 million.
- Choice Neighborhoods Initiative (CNI) Implementation Grant – A comprehensive Transformation Plan in the Greater Corktown area that will aim to revitalize the neighborhood while preserving affordability and increasing access to opportunity for existing residents. The Plan – if awarded - will focus on replacing distressed public housing and assisted housing with high quality mixed-income housing, improve educational outcomes and intergenerational mobility for youth and create conditions necessary for public and private reinvestment in distressed neighborhoods. While this grant is highly competitive, HRD is requesting approximately \$30 million from HUD for this Transformation Plan.
- Housing Resource Centers (HRC) – A one-stop-shop to help people with their housing needs. This includes intake screening and referrals to community resources that provide affordable housing assistance and wrap around services. The major goals for the HRCs are to increase utilization of housing stability services, connect residents to multiple services addressing concurrent barriers to housing stability, increase the pipeline to homeownership for aspiring homeowners and improve housing stability impact through an integrated service model. Currently, the City has identified one (1) network manager and six (6) network partners. This pilot program is set to begin in 2020-2021.

Section 2 - Demographic and Primarily Residential Criteria

2.1 Demographic Criteria

An NRSA must have a percentage of low- and moderate-income (LMI) residents that is equal to the community's "highest quartile percentage" as computed by HUD per 24 CFR 570.208(a)(1)(ii) or 70 percent, whichever is less, but not less than 51 percent.

Previous NRSA Plan 2015-2019: In 2015, the City used the following methodology to create the NRSA: The City's highest quartile percentage was over 70% LMI; therefore, 70% LMI was used to determine the LMI eligibility. Calculating the total LMI population within the NRSA boundary using the census tracts and block group tables, the NRSA is eligible if it has a 70% or more LMI. If the boundary cuts across a block group, the data from any block group the boundary touches will be included in the LMI calculation. Based on the regulations, the 70 percent threshold was applied which resulted in 551 eligible block groups included in the NRSA.

New NRSA Plan 2020-2024: Notwithstanding the changes in the boundaries, the NRSA comprises some of the most distressed residential neighborhoods in the City and meets the criteria established by HUD in CPD Notice 16-16" as "primarily residential" areas with at least 70 percent of the population being low-to-moderate-income (LMI). All qualify for NRSA designation based on the high percentage of low- and moderate-income (LMI) residents and other factors. According to the 1990-2018 population data from the U.S. Census Bureau, the population of Detroit declined by 34 percent between 1990 and 2018. Seventy-two percent of the City's population was low- and moderate-income (LMI) households (80% AMI or below) and its upper-quartile percentage of census block groups containing low- and moderate-income households was 90%. See Attachment C for low- to moderate-income calculation.

2.2 Primarily Residential

The CPD Notice states that the designated area must be documented as *primarily residential* but does not define a standard percentage. HRD used the HUD Guide to National Objectives & Eligible Activities for Entitlement Communities, Appendix E, page -11 through 3-13 (particularly the "Tips" on page 3-12) to guide on what is *primarily residential*. Also, Chapter 3 – Basically CDBG Handbook, page 3-6 notes that for an LMI service area, "*the activity must be primarily residential, and the activity must meet the identified needs of LMI persons. – An activity with a service area that is not primarily residential may not qualify under the LMI area benefit category even if the activity provides benefits to all residents in the service area and 51 percent of the residents are LMI persons.*"

To arrive at a primarily residential definition, the City of Detroit determined the percentage of land area classified as residential as a proportion of the total land area in the NRSA. In some NRSA, there are significant areas of vacant land due to demolitions and City owned property as well as commercial, recreational, and industrial uses. To meet the primary residential criteria, the City had to expand the boundaries into other contiguous residential areas resulting in a much larger NRSA.

The City used 60% or more of residential land as its definition of "primarily residential." Industrial, large commercial, and park areas will be excluded from the calculation. Vacant residential land will be excluded unless there is a specific plan or projects in the pipeline for redevelopment of the land into housing. Neighborhood commercial nodes or corridors will be included in the calculation. See Attachment C for "primarily residential" calculations.

Two of the main uses of the NRSA is benefits to individual beneficiaries (single-family homeowners, LMI limited clientele for public services, and LMI employees who qualify for jobs created) rather than an area benefit. The City wishes to balance the housing and economic development opportunities within the NRSAs by including job creation activities such as commercial corridors. that benefit LMI residents. An example might be projects that benefit elderly or senior citizens (“presumed” LMI under CDBG) such as a Senior Day Care facility located in a business district due to demand for the service and the convenience of a location close to public transit. Another example might be a small business incubator that would most naturally be in a business district.

As further referenced above for LMI areas in the CDBG Handbook Page 3-11, “... *it does not mean that activities located in commercial districts cannot be qualified under the LMI area benefit category on the virtue of their geography. The primarily residential test is applied to the service area of the activity.*”

2.3 NRSA Requirements

According to HUD guidance contained in the Community Planning and Development Notice CPD-16-16, a Neighborhood Revitalization Strategy Area (NRSA) designation must meet the criteria below to receive HUD’s approval. The City of Detroit’s proposed renewal of the NRSAs meet all the required criteria.

- Identified neighborhood boundaries of the NRSAs must be contiguous.
- Identified neighborhoods must be primarily residential and have a low/mod percent equal to the “upper quartile percentage” or 70% for Detroit.
- Selection of areas must be based on documented input from area’s stakeholders, including residents, business operators, financial institutions, nonprofits, and community groups. Documentation must include a description of outreach methods and a description of how the needs and concerns of stakeholders (especially residents) were incorporated into the plan.
- Selection of the NRSAs must be based on an assessment of economic conditions, opportunities for economic development and anticipated barriers and challenges.
- The implementation plan must promote the area’s economic progress with a focus on activities that will create economic opportunities for low- to moderate-income residents of the NRSAs.
- The NRSA Plan must identify achievable benchmarks over the period of the designation; and
- The NRSA Plan must be submitted with or as an amendment to the Consolidated Plan. The subject NRSA renewal application will be submitted with the City’s FY 2020-2024 Consolidated Plan.

2.4 Benefits of a HUD approved NRSA Plan

The benefits of a HUD approved NRSA Plan are detailed in amendments to the CDBG regulations at 24 CFR 570 per the Federal Register of January 5, 1995, and updated in the Final Rule dated November 9, 1995, as follows:

1. **Job Creation/Retention as Low/Moderate Income Area Benefit:** Job creation/retention activities undertaken pursuant to the strategy may be qualified as meeting area benefit requirements, thus eliminating the need for a business to track the income of persons that take, or are considered for, such jobs (24 CFR 570.208 (a)(1)(vii) and (d)(5)(i));
2. **Aggregation of Housing Units:** Housing units can be part of a single structure for the purposes of applying the low-and moderate- income national objective criteria. If 51% or more of all the

assisted units provide a LMI benefit, all units are considered as meeting a national objective; therefore, allowing assistance to housing occupied by non-LMI households. All eligible housing assistance such as home repair, new construction through a CBDO and home purchase assistance are allowed. (24 CFR 570.208(a)(3) and (d)(5)(ii)).

3. **Aggregate Public Benefit Standard Exemption:** Economic development activities carried out under the strategy may, at the grantee's option, may be exempt from the aggregate public benefit standards, thus increasing a grantee's flexibility for program design as well as reducing its record-keeping requirements (24 CFR 570.209 (b)(2)(v)(L) and (M)); and
4. **Public Service Cap Exemption:** Public services carried out in the NRSA by a Community Based Development Organization (CBDO) are exempt from the 15% public service cap allowing more services in the NRSA and better leveraging of public service funding. (24 CFR 570.204(b)(2)(ii)).

Section 3 - NRSA Descriptions

To coordinate investment and create a greater impact in neighborhoods, the City of Detroit originally used the boundaries for the Hardest Hit Funds (HHF) program as a starting point in creating the 2015 NRSAs. The boundaries were based on Detroit Future City planning effort and areas with strong marketability for redevelopment investments. The Detroit Future City planning effort was an intensive process over three (3) years to develop a comprehensive analysis of all the City's neighborhoods. The vision resulted from a 24-month-long public planning process that drew upon interactions among Detroit residents and civic leaders from both the nonprofit and for-profit sectors, who together formed a broad-based group of community experts. From the results of this citywide public engagement effort: a team of technical experts crafted and refined the vision; rendered specific strategies for reaching it; shared their work publicly at key points; and shaped it in response to changing information and community feedback throughout the process.

For the 2020 NRSA boundaries, the City used the 2015 boundaries as a starting point as well as demographic data from the 2011-2015 American Community Survey (ACS) and plans from several public and private sector investment initiatives. A map of the proposed 2020 NRSAs is included as Exhibit A, and below is a summary description and demographic profile infographics for each proposed NRSA. A more detailed assessment of economic and neighborhood conditions is provided in Section V of this Plan.

3.1 NRSA Demographic Profile and Boundaries

NRSA 1:

Located on the City’s Southeast side, NRSA 1 is bound on the East by Mt. Elliott Street, south by McNichol’s Rd., west by Cadieux Rd, and Gratiot Ave. near the north. While there is an increase in near-term and long-term investment, NRSA 1 shares a 75 percent LMI rate. NRSA is the home to the FCA Mack Engine Plan, the Marina District and in addition, this NRSA makes up three (3) SNF neighborhoods, which include the Jefferson Chalmer neighborhood, East Warren/Cadieux, and Islandview/Greater Villages neighborhoods. Two (2) Housing Resource Centers are currently working within the NRSA 1 boundaries.

The Jefferson Chalmers neighborhood – a national historic designation – is currently slated for significant redevelopment that includes commercial corridor improvements, single family, and multi-family revitalization improvements. Jefferson Chalmers has a strong presence of community block clubs and civic engagement.

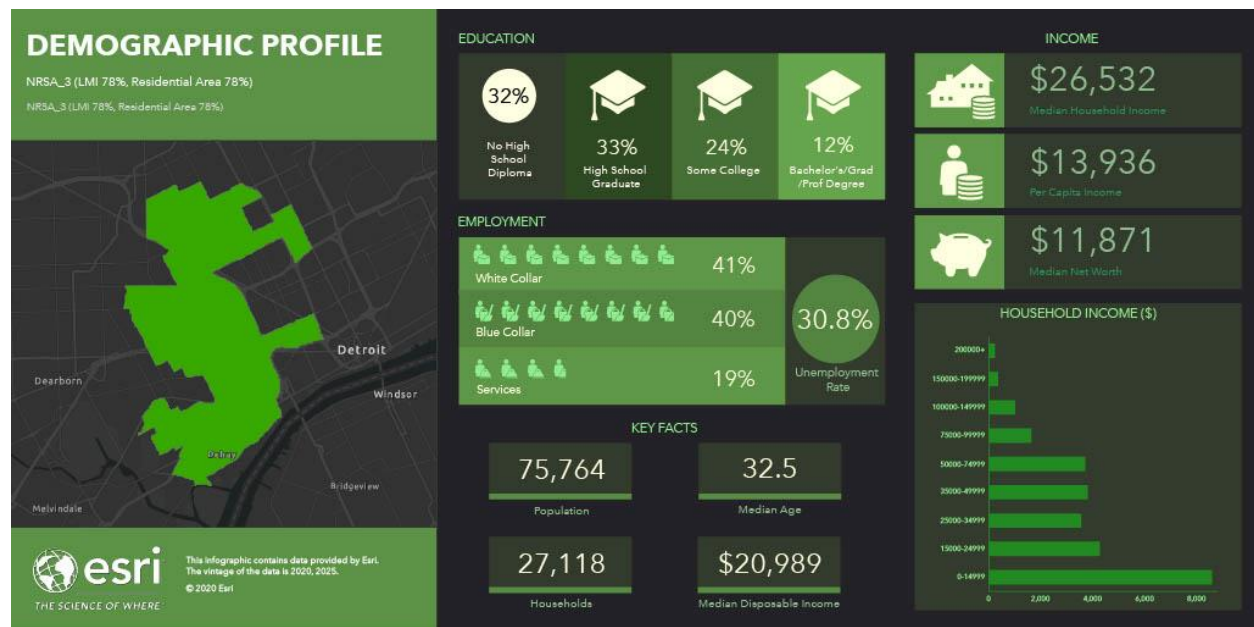

The East Warren/Cadieux area includes neighborhoods such as East English Village, West Village, and the Morningside neighborhood; the I-94 corridor runs just north of this area. The Islandview/Greater Village is slated for park renovations, single family and duplex rehabilitation and streetscape improvements.

NRSA 2:

Located on the City's Northeast side, NRSA 2 is bounded by 8 Mile Rd. to the north, Moross to the east, Edsel Ford Freeway to the southeast, I-75 Freeway to the west and Caniff St. to the south. This NRSA includes the Jane Lasky Park and Recreation Center, Regent Park, and the Osborne Neighborhood. This NRSA includes two expanded SNF neighborhoods, which include the Gratiot/7-Mile SNF neighborhood and the Campau/Banglatown neighborhood. The City intends to invest in the following near-term projects over the next 3-5 years, including but not limited to: housing rehabilitation and economic development.

NRSA 3:

Located in Southwest Detroit, NRSA 3 is bounded by Jefferson Ave. to the south, Springwells St. to the west, Elmhurst St. to the north and Woodward Avenue to the east. NRSA 3 contains several historic

neighborhoods such as Virginia Park, and the southern portion of the Boston Edison neighborhood. In addition, the area includes the Springwell neighborhood and Mexicantown. The Southwest Vernor SNF is also nestled within this NRSA. Substantial investment, both long-term and near-term include park renovations to Clark Park, multi-family construction, streetscape improvements and demolition. Additionally, two (2) Housing Resource Centers are currently located within the NRSA 3 boundaries.

NRSA 4:

Located in the southeastern part of Detroit, NRSA 4 is bounded by Jeffries Freeway to the north, Trinity St. to the west, Ford Rd. to the South and Hubbell St. to the east. This area includes the Warrendale/Cody Rouge SNF neighborhood and is close in proximity to the Rouge Park. The City intends to leverage both private and public funds into greenway projects that will connect neighborhoods to the Rouge Park.

NRSA 5:

Located on the City's Northwest side, NRSA 5 is bound on the north by 8 Mile Road, on the west by Livernois Avenue, by the south on I-96 and the east near Livernois Avenue. NRSA 5 makes up a 72 percent LMI rate **and** includes the Northwest Grand River SNF neighborhood, the Livernois – McNichols neighborhood and the historic Grandmont-Rosedale neighborhood. Population numbers for the Northwest Detroit area have declined – however, rates of loss are slowing down. Between 2010 – 2014, Northwest Detroit showed a population rate decrease of over 1.6 percent; however, projections show a rate of .90 percent predicted for 2016-20211. The City's near-term investment plans for this area includes adaptive reuse, historic preservation, streetscape & mobility improvement, and commercial corridor revitalization.

See Attachment C for census tract and block group information for the NRSA's.

Section 4 - Community Consultation

The community consultation process for creating the renewal of NRSA's and selecting the 2020 NRSA's included several outreach efforts that were conducted in conjunction with the FY 2020-five-year Consolidated Plan. The onset of the COVID-19 pandemic, the resultant shut down of services, closure of businesses, and social distancing limited the City's ability to conduct a more thorough community consultation. In developing the implementation plans tied to the proposed strategies for the NRSA's, the City will carry out other consultation meetings. City staff requested information and consulted with its partners on the accomplishments from the 2015 NRSA's. These consultations included Detroit LISC, DEGC, Detroit Employment Solutions Corporation (DESC) and other stakeholders. Questions on the NRSA process were included in the community stakeholders and agency surveys. Consultations on the renewal NRSA's

¹North River Northwest, Neighborhood Framework – Planning and Development Department City of Detroit, July 2018 <https://detroitmi.gov/sites/detroitmi.localhost/files/2018-10/Grand%20River%20Northwest%20Neighborhood%20Framework%20Book%281%29.pdf>

was conducted with the agencies, organizations, and City departments as well as through public meetings, surveys, and focus groups as described below. See Attachment F for list of organizations that completed surveys including feedback on the NRSAs.

Community respondents were from 77 different areas in the City and encompassed the existing NRSAs. These areas included, but not limited to, Woodrow, 12th and Clairmont, Cody Rogue, Boston-Edison, Cornerstone Village, Brush Park, Bagley, Lafayette Park, Elmwood Park, Farwell, Morningside, Rosedale, East English Village, and Jefferson Chalmers. The zip codes most cited were 48206, 48207, and 48202. Organizational respondents were those that served mostly extremely low to low-income families. The majority were advocacy organizations, provided housing needs such as home buyer education or rental/homeowner housing and housing repair, or offered services targeted at groups such as the elderly, children and youth, those with HIV and experiencing homelessness, and those who need employment training. Of the 157 community residents consulted through survey responses, 55% were property owners, 20% were business owners, 22% were renters, 40% were CDCs, social services and health organizations, and 11% were landlords. For demographics, over half of the respondents were Black or African America, 30% were Caucasian or White, and the remainder consisted of Asian Americans 1%, Multi-racial -6%, American Indian/Alaska Natives – 1%. Eight percent of the respondents did not answer. See Attachment G is a summary of public comments including those on the NRSAs.

Online and paper versions of the community stakeholder/resident survey and an agency survey were posted and distributed for roughly 3 months, longer than the standard 30 days because of delays due to the COVID-19 pandemic. The surveys requested information on housing and community development needs. There was a total of 200 responses including 157 community members (79%) and 43 agency representatives (21%). Of the 157-community stakeholder/resident survey respondents, 129 were residents and the remainder were business owners, landlords, community organizations, and other stakeholders. Information on known were related to Housing and Development. Respondents noted housing development projects including home repairs, new developments, and street improvements. The greatest needs in neighborhoods were identified as multi-family and single-family affordable housing, redevelopment of vacant lots, business and commercial development with an emphasis on small business creation and support of existing and future small businesses, job skills and training, public services for youth and seniors, transportation, public safety, redesign and beautification of public infrastructure, community spaces, and demolition.

Over 555 residents and stakeholders (i.e. neighborhood associations, district councils, non-profits, etc.) attended the list of meetings below. Information on the Consolidated Plan and the NRSAs was presented and attendees were asked to provide feedback and comments both verbally and through the surveys.

- Virtual Public Meetings held on August 25th, 2020 – 49 participants
- Virtual Public Meetings held on September 2nd, 2020 – 166 participants
- A NOF Public meeting was held for non-profits on February 18th, 2020 – 70 Participants
- A District #5 Resident meeting was held to announce the survey and public meetings on February 18th, 2020 – 70 participants
- Public Hearing and review and approval of the plan at the Detroit City Council Meeting held on November 17, 2020
- The NRSA draft plan was published for a 15-day period from 10/15/2020 to 10/30/2020 with printed copies at City Hall and on the City's website.

Residents and stakeholders were eager to provide feedback. While some of the respondents understood the need to target investment to realize significant change, others were concerned that the NRSAs would omit certain areas. Residents also identified several areas within their neighborhoods that they wished to be included. However, residents were advised that the inclusion of areas would be subject to meeting the NRSA LMI population requirements. In addition, residents wanted to make sure that targeted investments were coordinated with other activities. The final comments received during the public comment period will be reviewed and incorporated into the final NRSA strategy.

HRD is actively working with providers to review CBDO eligibility and certify providers located in the proposed NRSA plan. The City has streamlined this process where an applicant can fill out a CBDO application via DocuSign, HRD staff will review the application and then work on collecting source documentation and determining whether a provider is eligible to become a CBDO. In addition to this, the Community Development division is working with the Housing Underwriting division to review CHDOs and to see if the City's CHDOs are eligible to become a CBDO. The Community Development division recently hired a FTE that will be responsible for working with non-profit providers to assist with capacity building. For example, this could include advising the non-profit that they may want to set aside a number of vacant board positions in order to qualify as a CBDO. The City will also continue to work with stakeholders throughout the NRSA designation; this includes posting quarterly reports on HRD's Website and sending this out to stakeholders such as the DEGC, the DESC, the Housing Resource Centers and the Department of Neighborhoods.

The City will actively work to engage and recruit stakeholders and organizations to participate in the Housing Resource Centers, recruit and engage with CDFIs to participate and undertake NOF and Home Repair Program activities identified in the NRSA Plan.

Section 5 - Assessment of Economic and Neighborhood Conditions

5.1 Demographics

The City of Detroit's demographic and economic composition has changed significantly over the last 60 years as the city experienced a decline with the shifts in the automobile industry. The consequences of these changes have led to many externalities which the City of Detroit is currently trying to address through the NRSA designation of certain neighborhoods. Demographic shifts such as population loss, racial and ethnic composition, and an aging of the population are explored in this section of the report.

Population

The five designated NRSAs in Detroit contain 49 percent of Detroit's population. Figure 1 shows the relative sizes of each designated NRSA area. The largest NRSA by population is NRSA 5 which has slightly more than 94,000 residents and includes neighborhoods such as the Grandmont-Rosedale Neighborhood. The NRSA with the fewest number of residents is NRSA 4 with about 51,000 residents and includes the areas of Warrendale, Grandale, and Herman Gardens.

Figure 1: Total Population

The identified NRSA's have experienced population declines in the past like those found across the rest of the city. The resulting decline in population has led to an increase in vacancy and further disinvestment in the housing stock within each NRSA.

Population by Race

Black/African Americans comprise about 80 percent of Detroit's population. Based on data provided by HUD, across the entirety of the city, no single census tract has a concentration of less than 53 percent of Black/African Americans. Figure 2 compares the racial composition of each NRSA to the City of Detroit. The area with the least diversity is NRSA 5 where 95 percent of the population is Black/African American. Conversely, the area with the greatest diversity of population is NRSA 3 which is in the southwest of the city. In this area, Black/African Americans are generally not the predominant racial group, but rather the White (Hispanic) and Other (composed of Asian, Native American, and those identifying with more than one race) are the majority, representing a combined 58 percent of the population.

Figure 2: Population by Race

The demographics of NRSA 2 are interesting because those identifying as Other represents 9 percent of the population. Of those classified as Other, many identify as Asian. The Asian population in Detroit is generally found near Hamtramck, a historically Polish community, which in recent times has seen an increase in Arab and South Asian populations. During the 1970's the Hmong population initially settled in the area and subsequent waves of immigration have resulted in a greater diversity of residents.

About 13 percent of the population in Detroit is White. This population group, while integrated into some neighborhoods, tends to generally be found on the periphery of the city or near Midtown, Downtown, and areas along the riverfront which have seen significant capital investment. Over the last 10 years, there has been an influx of White residents to these areas.

Population by Ethnicity

Across Detroit, the Hispanic/Latino population accounts for nearly 8 percent of the population. As mentioned earlier, NRSA 3 includes the neighborhoods with the largest concentration of Hispanic/Latino residents. Mexicantown is a nearly 100-year-old community which has a large concentration of Hispanic/Latino households, and account for about 72 percent of the population. In NRSA 3, the Latino/Hispanic population accounts for 44 percent of the population.

Figure 3: Population by Ethnicity

Population by Age

Population by age is one way to look at the demographic makeup of a community and assess potential housing, employment, and service needs. A large youth population could be an asset, as younger workers may have an easier time adapting to a changing economic ecosystem and are often exposed to a range of college education, apprenticeships/internships, and training. In Detroit, about 23 percent of the population is under the age of 18. At the other end of the age spectrum, seniors (those older than 65) make up 14 percent of the population and tend to be in the latter part of their working years or into retirement. In Detroit, about 25 percent of the population is between the ages of 35 and 54, which can be considered prime earning years. These individuals tend to establish roots within communities and have school-aged children.

Figure 4: Population by Age

The five NRSA’s have somewhat similar age distributions of residents between the ages of 18 and 64. The NRSA with the largest percentage of children is NRSA 4, where 30 percent of the population is under 18 years of age, while the NRSA with the smallest youth population is NRSA 1, having only 25 percent of the population under the age of 18 years. The percent elderly is largest in NRSA 1 and 5, with 13 percent of the population classified as elderly. The smallest percentage of elderly individuals are in NRSA 2 and 4, each having just 9 percent of the population classified as elderly.

5.2 Households

This section examines households in each NRSA from an income perspective. Key data points explored in this section include low-and-moderate households, median household income, and relative income distribution across the NRSA’s.

Low-and-Moderate Income Households

Globalization and the decline of manufacturing greatly impacted the City of Detroit over the last 40 years and have resulted in changes to the City’s economy and resultant household income. The automotive industry, which has been the backbone of the regional economy, has dealt with changes in technology, supply chains, competition, and consumer preferences. For the city, these changes have resulted in higher unemployment and out-migration of residents. These economic conditions have resulted in high numbers of households qualifying as LMI. Moderate-income households have an annualized family income between 50 percent and 80 percent of the area median income (AMI), while low-income households have an annualized family income of less than 50% of the area median income.

Figure 5: Low-and-Moderate Income Persons

In Detroit, about 72 percent of the population is classified as LMI, illustrating the economic and income challenges residents face. Households that qualify as LMI may have difficulty finding and securing safe and affordable housing. Additionally, these households have limited disposable incomes for necessities. The five identified NRSA's have LMI populations greater than the city-wide figure of 72 percent, with NRSA 3 and 4 having the largest percentage of LMI population at 78 percent.

Median household Income

While the city still faces significant challenges, work continues to strategically position Detroit for attracting new businesses, investment, and talent. These elements are key for building a knowledge and service-based economy given the changes in traditional industrial sectors. Even with the changes observed across the city over the last decade, the median household income in Detroit remains low. In 2015, median household income was \$29,841 which is nearly half the nationwide median. Aside from NRSA 2 and 5, the median incomes in the NRSA's are below the city-wide median.

Figure 6: Median Household Income

The distribution of household incomes within each NRSA shows the degree to which households may be struggling, particularly those who are currently in housing priced higher than what they may be able to realistically afford. Across the five NRSA's, more than 25 percent of the households have incomes below \$15,000 per year. Between 40 and 45 percent of households are earning at or below the federal poverty line placing tremendous pressure on individuals and families to balance housing costs with other daily needs like healthcare, education, transportation, food security, and more.

Figure 7: Household Income

5.3 Economics

Local economic conditions are an important factor to look at when identifying strategies for NRSA and how to provide better outcomes for the LMI population. Understanding the existing employment landscape can help in targeting specific policies and programs. This section describes labor participation and employment, occupations, wages, and establishments across each of the selected NRSA.

Labor Participation and Unemployment

The declines in historic manufacturing industries across the city and region have resulted in job loss and declining household incomes for many in Detroit. The periods of economic decline have also created a lower labor participation rate for working age residents. Across the city, unemployment varies with some

city census tracts experiencing unemployment rates of between 19 percent and 45 percent. Figure 8 shows the labor force participation rates by NRSA.

Figure 8: Labor Participation Rate

Detroit Occupations and Wages

The decline of manufacturing jobs has played a major role in Detroit's population decline from a peak of almost two million residents in the 1950s. Today, the City's predominant industries include businesses in Health Care and Social Assistance; Arts and Entertainment; Manufacturing; and Professional and Technical Services. From an occupational standpoint, the largest occupations include Healthcare Diagnosing, Business Operations Specialists, Food and Beverage Serving Workers, and Information and Record Clerks. Figure 9 presents the top ten occupations and wages for Detroit.

Figure 9: Top Ten Occupations and Wages in Detroit

Many of the top occupations, outside of those requiring computer or technical skills, are low wage jobs. The importance of education cannot be understated, as workers with low levels of education will find it more difficult to compete for living wage jobs. Existing industries such as automotive and manufacturing are now requiring workers to have higher levels of education, technical skills, and the ability to adapt to technological change. Investment in human capital is necessary to ensure everyone in Detroit has an opportunity to be gainfully employed. The City has programs available to help improve individual's capabilities around basic skills, technical training, and educational credentialing.

Local Business Composition

Table 1 presents business listing data for each NRSA individual and in aggregate. Based on the local data, Retail Trade and Service firms make up 74 percent of businesses found in the NRSA. These types of businesses may rely on a workforce that has lower levels of education and technical skills. Additionally, businesses such as these may also have higher turnover and offer lower wages.

Table 1. NRSA Based Establishments by Industry, 2020						
Establishments by Industry	NRSA 1	NRSA 2	NRSA 3	NRSA 4	NRSA 5	Combined NRSA
Construction	24	11	53	14	30	132
Finance, Insurance, and Real Estate	164	69	197	55	145	630
Greenhouses/gardens	0	0	2	0	1	3
Manufacturing	30	27	57	19	47	180
Mining/Gas	0	0	0	0	1	1
Public Administration	13	29	42	18	25	127
Retail Trade	284	328	377	224	501	1,714
Services	571	476	1,035	399	883	3,364
Transportation, Communications, Electric, Gas, and Sanitary service	23	15	52	5	22	117
Wholesale Trade	50	27	77	11	48	213
Non-Classifiable Establishments	67	47	103	62	102	381
Total Establishments	1,226	1,029	1,995	807	1,805	6,862
Source: City of Detroit, 2020						

The employment distribution by industry sector within each NRSA presents an interesting picture of their relative industry advantage. Figure 10 shows that while many industries have similar representation across the NRSA's, the Manufacturing industry represents 31 percent of the jobs found in NRSA 5. Manufacturing jobs tend to have higher pay and require workers to have technical skills. The data also shows that NRSA 3 has about 15 percent of its local employment clustered in the Finance, Insurance, and Real Estate industries. On average, these industries tend to pay more than traditional retail and service sector jobs.

Figure 10: NRSA Employment by Industry

5.4 Housing Conditions

The composition and condition of housing is an important consideration within an NRSA. Programs and funding can and should be targeted to improving the quality of existing housing, as well as encouraging investment in new housing to meet the needs and affordability of residents. This section describes the housing stock, median values, and median gross rents across each of the selected NRSA.

Total Housing Units

The designated NRSA areas within the City of Detroit account for 53 percent of the City’s total housing stock. As of 2015, Detroit had a total of 365,528 housing units with 193,358 units located within these five NRSA.

Figure 11: Total Housing Units

Housing Tenure

Within the City of Detroit, approximately 51 percent of all residents live in an owner-occupied housing unit compared to 49 percent of residents living in a renter-occupied unit. The graph below shows how the five NRSA areas compare to the City as a whole. NRSA 2 and 5 exceed the City's current

Figure 12: Housing Tenure

percentage of residents living in owner-occupied residents by 3 and 4 percent, respectively. The other three NRSA areas more closely resemble the near 50/50 split seen city wide.

Residential Structures – Year Built

Detroit’s overall housing stock is older with 87 percent of all residential structures built prior to 1970. Nearly all the NRSAs mirror the Detroit’s age of structure composition, with several exceeding the number of structures constructed prior to 1970. NRSA 2 and 5 have 94 and 92 percent of their structures built before 1970, respectively. Only 1 percent of all structures in the City were constructed after 2010, which is very similar across the NRSAs as well. This creates challenges for the city and property owners around on-going maintenance and rehabilitation of residential structures, particularly with the lower household incomes of many Detroit residents.

Table 2. Year Built for Residential Structures						
Year Built	NRSA 1	NRSA 2	NRSA 3	NRSA 4	NRSA 5	Detroit
Total Housing Units	100%	100%	100%	100%	100%	100%
Built 2010 or Later	2%	0%	1%	1%	0%	1%
Built 2009 - 1990	6%	1%	5%	4%	3%	5%
Built 1989 - 1970	5%	4%	6%	7%	4%	7%
Built 1969 - 1940	40%	71%	26%	72%	73%	53%
Built 1939 or Earlier	47%	23%	64%	15%	19%	34%

Source: ACS 2018

Vacancy

Local housing conditions are a contributor to housing values and an influencer of market forces. There are 109,788 vacant housing units in the city, which accounts for about 30 percent of the entire housing stock. Vacancy increased by 11 percent between 2011 and 2015. Of the vacant units, 72 percent or 78,501 are classified as Vacant-Other which indicates these units are in various states of disrepair, have title issues, or have been abandoned. Between 2011 and 2015, the number of units categorized as Vacant-Other increased by 23,194 units or 42 percent. The increase in vacancy occurred even though the Detroit Land Bank has an active demolition program. Vacancy rates across each of the NRSAs are somewhat like the city, although NRSA 1 and 3 are experiencing higher rates of vacancy than other areas.

Figure 13: Residential Vacancy

Building Activity

Between January 2019 and September 2020, the City of Detroit issued 292 building permits citywide for new construction (commercial and residential structures). The City also issued 7,246 building permits for alternations to existing structures. During the same period, the City also issued just under 4,000 demolition permits which mean for every permit issued for new construction, fourteen permits are issued for demolition of structures.²

² City of Detroit Open Data Portal, September 2020.

Figure 14: Map of Demolition Permits in Detroit, 1/2019 to 9/2020

Median Home Value

The median value of homes in Detroit was \$43,900 in 2015 which is approximately half the value of homes across Wayne County, and \$135,000 less than the median value across the United States. Each of the NRSAs, except for NRSA 5, fell below Detroit's median value. The age of the housing stock, median household incomes, and impacts of the Great Recession have created a significant housing challenge for many of Detroit's neighborhoods. Owner-occupants may find it challenging to keep up with on-going maintenance and rehabilitation needs given current incomes and what may be available to a household to maintain homes over time.

Figure 15: Median Home Value

Median Gross Rent

In 2015, the median gross rent for a unit in Detroit was \$841 per month which was higher than the median for Wayne County (\$794). By comparison, median gross rent in the United States was \$928 per month. Three of the five NRSA's had median gross rents above the city average, while NRSA's 1 and 3 had lower rents.

Figure 16: Median Gross Rent

5.5 Quality of Life

In addition to demographic, economic, and housing conditions, the improvements within the NSRAs should also consider quality of life. These issues and opportunities go hand in hand with NRSA changes and can also be factors the City focuses on in addition to the physical changes to housing and business development in each area.

Education

Education strongly correlates to income, prosperity, and quality of life. One way to measure the educational opportunity is to look at the educational attainment of residents 25 years and older. This data from the Census provides a detailed snapshot of the education of residents within each NRSA and the City of Detroit. Overall, each NRSA tracks very closely to the City with one-third of residents having a high school diploma and another third having some college education. Between 9 and 12 percent of residents across the five NSRAs have earned a bachelor's degree or higher.

	NRSA 1	NRSA 2	NRSA 3	NRSA 4	NRSA 5	Detroit
No High School	3%	3%	3%	3%	3%	3%
High School Graduate	34%	36%	31%	37%	35%	33%
Some College	32%	33%	23%	34%	35%	32%
Bachelor's or Higher	12%	9%	9%	9%	12%	13%

Source: ACS 2015

Crime Rate

Incidents of crime can be a major contributor to quality of life and feeling of safety in a neighborhood or city. Higher incidents of crime can also be tied back to the opportunities a neighborhood or city has to

offer its residents such as access to jobs, the quality of the educational system, safe and secure housing, quality of the built environment, and access to before and after school activities for students. According to the City of Detroit’s RMS Crime Incidents data, between 2017 and 2019 incidents of crime have risen 3.1 percent from 81,454 to 83,956. In 2019, 66 percent of crime incidents fell into five categories which include assault, larceny, property damage, aggravated assault, and fraud. The number of homicides citywide was also up 7 percent over the three year period.³ Utilizing the NRSA strategy can help bring added investment in housing, infrastructure, and jobs to these neighborhoods to help create more opportunities for residents and improve the places they live.

Vacant Land

An on-going challenge in the City of Detroit is the presence of vacant and dilapidated structures across many neighborhoods. To combat the visual and physical impacts of these vacant structures, the City and the Detroit Land Bank have worked tirelessly to demolish vacant structures. As was noted above, the City issued 4,000 demolition permits over the last twenty months (not all permits may be for permanent structures). Table 4 illustrates the percentage of vacant land as classified by the City of Detroit, which includes both vacant residential and vacant commercial land.

Table 4. Vacant Land					
	NRSA 1	NRSA 2	NRSA 3	NRSA 4	NRSA 5
Vacant Residential	24%	17%	10%	14%	15%
Vacant Commercial	5%	5%	4%	5%	3%
Source: City of Detroit Assessor’s Office					

Access to Transportation

Transportation is a key component of an individual or family’s quality of life. Transportation provides access to jobs, school, healthcare, childcare, grocery stores, parks, and recreation, and much more. Nearly 70 percent of Detroit residents over the age of sixteen and in the workforce drove to work alone in a personal vehicle, while 13 percent carpooled. Only 9 percent of Detroit’s working residents utilized public transportation to get to work. The large majority, nearly 90 percent, of Detroit resident workers had access to at least one personal vehicle for commuting purposes. Only 11 percent of resident workers did not have access to a vehicle.⁴ The need for a vehicle is driven by both the large geography of the city, but maybe more importantly, 68 percent of working residents traveled outside Detroit for work.⁵ This necessitates access to a vehicle as many transit routes may not connect to outside employment centers or the commute time plus transit frequency makes the trip less convenient.

For jobs located in the City of Detroit, the transit routes managed by Detroit Department of Transportation (DDOT) are quite extensive covering nearly all major roadways corridors across the city. Figure 17 below provides a snapshot of DDOT’s transit coverage.

³ City of Detroit Open Data Portal, RMS Crime Incident Data, 2017-2019.

Figure 17: DDOT Transit Route Map

Section 6. - Housing and Economic Opportunities/Empowerment Strategy

6.1 Empowerment Strategy

To achieve the objectives and take advantage of the benefits of the FY 2020-2024 NRSAs, the City of Detroit through HRD plans to promote and facilitate the economic progress of each selected NRSA. The economic progress will be defined by the measurable increase in affordable housing and economic opportunities that will be of principal benefit to low- and moderate-income (LMI) individuals and households. Empowerment strategies will include the following:

- **Housing Opportunities:** Develop housing opportunities available to households with a broad range of incomes to meet the needs of LMI and to attract middle-income households to improve the housing market. The City has developed a multi-family housing strategy that targets multi-family and single-family rental housing including low income housing tax credit (LIHTC) and developed financing pools to facilitate developers. The City plans to complete a single-family housing strategy that focuses on homeownership using a similar financing approach as the multi-family strategy.
- **Economic Opportunities:** Develop and fund programs from multiple sources that create or retain jobs that contribute to the economic stability and self-sufficiency of LMI households and persons. Programs will include financial and technical assistance including working capital, equipment, and workspace improvements for small businesses and microenterprises. The strategy should include support services such as job training, transportation, education, health, and childcare which are public services eligible under CDBG regulations. The use of a designated Community Based Development Organization (CBDO) undertaking a neighborhood revitalization, community economic development, or energy conservation project [24 CFR 570.204(b)(2)(ii)] will create economic opportunities.

6.2 Stabilize Neighborhoods

The neighborhoods in Detroit are suffering from safety issues, blight, and vacancy. This has resulted in low property values, lack of investment in property improvements, and a supply of housing stock that currently exceeds demand in many neighborhoods. In addition, home buyers find it difficult to secure financing because appraised values are lagging. Low property values prevent homeowners from securing home equity credit lines and buyers from securing a mortgage on the sale price. Lack of capital to promote new homeownership, invest in needed property improvement and retention of existing housing stock cuts across all income groups. It is not only LMI households who are unable to find financing to improve their homes. Even households with incomes above 80% AMI have difficulty in securing financing due to excessive loan-to-value ratios because of twin issues of declining housing values and under-valuation in the market. A successful and long-lasting approach to neighborhood stabilization and blight elimination must be holistic addressing the root causes including vacant and dangerous structures, access to credit, disinvestment, and demand.

The following related housing and economic activities will be used to contribute to the economic revitalization of the NRSA neighborhoods:

6.3 Housing Opportunities

Neighborhood Stabilization through CDBG-funded Owner-Occupied Housing Repair Programs

The current CDBG-funded Home Repair programs will be expanded to protect our most vulnerable residents with emergency home repairs to assist qualified families with minor or major home repairs and to promote rehabilitation of vacant properties purchased through the Land Bank's online auctions.

a. Emergency Senior Home Repairs

The City will spend approximately \$15 million in CDBG funds over the next five years as identified in the Consolidated Plan for the emergency replacement and repair of roofs, furnaces, porches, plumbing, and electrical affecting the immediate health and safety of occupants. Grants are available city-wide for eligible residents. In order to be eligible for the program, residents must be approved by the City and have a minimum age of 62 years or 55 years of age and on social security and disability assistance.

b. Zero Percent (0%) Home Repair Loan Program

In 2015, the City established a zero percent interest home repair loan program called the Zero Percent Home Repair Loan Program (HRLP) using CDBG funds as a credit enhancement to leverage \$10 million in private capital, mitigate risk, and increase the amount of home repair funding available to Detroit residents of various income levels. Between 2015 and 2020, over 800 home repair loans were approved with 515 repairs completed with households with incomes ranging from below 30% AMI to up to 120% AMI in the NRSAs. During the next 5 years of the NRSA strategy and Consolidated Plan, the City will continue to invest in the HRLP with approximately \$12.5 million in CDBG funds, which will be matched with an equal amount of private capital. The program will support existing homeowners in maintaining their homes while positioning new homeowners to purchase and repair vacant homes and contribute to property rehabilitation that stabilizes neighborhood housing markets. Through the NRSAs, homeowners with incomes above 80% AMI will also be assisted to improve housing values and lack of capital needed to preserve existing housing stock and address neighborhood decline in the City.

c. Lead Abatement Grant

The City of Detroit receives funding under the federal Healthy Homes – Lead Hazard Reduction Demonstration Program for lead abatement. Approximately \$5 million is projected to be spent over the next five years of the Consolidated Plan. These funds will be provided as grants to households with children under six years of age who either live in or frequently visit the property. This process can involve the installation of new windows, doors, and siding. The City works with the Michigan Department of Health and Human Services (MDHHS) and the Detroit Health Department to prioritize eligible families through the application process and into the program that can best address the lead hazards that may be present in their home. In addition to this, the City works with HUD's Office of Lead Hazard Control and Healthy Homes (OLHCHH) which increases the City's leverage to approximately \$14 million dollars.

d. CDBG-Funded Multi-family Rental Rehabilitation Housing Development

The City will continue to invest \$32.5 million in HOME Investment Partnership Program funds to support affordable housing of which a part will be multi-family housing development with availability for investment in the NRSAs. About \$6 million in CDBG funds over five years is also planned to finance predevelopment costs for multi-family rental projects seeking to leverage federal funding and Low-Income Housing Tax Credits (LIHTC) through the State of Michigan. Due to the new 2013 HOME Program rule, many potential affordable housing projects would not qualify for funds through the HOME NOFA because of their stage of development. The CDBG funds will be used to help those projects reach a higher level of readiness resulting in more viable projects eligible for HOME and LIHTC funding. CDBG funds will be used to cover eligible costs such as market studies, architect/engineering, site readiness, environmental, feasibility, and infrastructure costs in support of eligible activities.

Affordable Housing Leverage Fund (AHLF)

Affordable housing is central to the City's inclusive growth strategy and plays a key role in the ability to retain existing residents, attract new residents, and create mixed-income communities. To address its affordable housing needs, the City's Housing & Revitalization Department (HRD) partnered with Detroit LISC, MSHDA, along with local financial institutions and foundations to create the Affordable Housing Leverage Fund (AHLF). The AHLF provide affordable housing developers and owners with streamlined access to financial products such as loans, grants, and guarantees that are specifically designed to address housing challenges in Detroit neighborhoods.

AHLF encourages the preservation of regulated and naturally occurring affordable housing citywide and the development of new mixed-income and affordable housing in targeted multi-family housing areas. The City seeded the AHLF with \$50 million in CDBG, HOME, and general funds and intends to grow the fund with philanthropic and financial institutional support to \$250 million, which will unlock \$765 million in total investment. The AHLF is expected to preserve 10,000 units of existing affordable housing and the development of 2,000 units of new affordable housing.

Homeownership Opportunities

The City will provide CDBG and HOME funding for homeownership opportunities including those within the NRSAs as follows:

a. Detroit Land Bank Authority (DLBA) Auctions

The Detroit Land Bank Authority (DLBA) launched the auction website in May 2014 to connect potential homebuyers with vacant Detroit Land Bank-owned houses. The auction started with selling one home five days a week and is now selling two houses seven days a week. The auction has sold nearly 300 houses since its inception. Several financial institution are partnering with the DLBA to finance the acquisition and rehabilitation of purchased properties.

b. Homeownership – acquisition of existing housing units

The City will provide CDBG and HOME funds to assist LMI households and individuals including those within NRSAs to purchase existing houses for rehabilitation for homeownership. Funds will also be used to provide down payment and closing costs assistance to purchase existing houses for sale to homebuyers.

6.4 Slum and Blight Reduction for Neighborhood Stabilization

The City will provide CDBG funds for slum and blight reduction and elimination on an area or “spot” basis including within NRSAs. In FY 2020-2021, the City has not allocated a specific amount to this activity for the NRSAs.

Demolitions

The following agencies have worked in partnership to create a comprehensive demolition strategy. These agencies include HRD, DLBA, and the Detroit Building Authority (DBA). Approximately \$5 million of CDBG is slated for commercial and residential demolition focused on neighborhood commercial corridors over the next five (5) years.

6.5 Economic Opportunities

The City of Detroit’s economic development strategy focuses on economic development assistance programs that will focus on small business development and microenterprise assistance by creating meaningful employment opportunities and promoting comprehensive neighborhood revitalization throughout the City.

Over the next five (5) years, approximately \$12.5 million in CDBG funding is expected to be invested in economic development activities. This includes initiatives such as a Small Business Development Program and a Commercial Corridor Development Program. HRD is currently working on implementing these programs in and will tentatively begin in early 2021.

In addition to this, the City will continue to provide CDBG public service funds for the GDYT Program that will assist in summer youth jobs for youth age 14-24 that reside in an eligible NRSA.

Small Business Development

The City will invest approximately \$7.5 million over the next five years to implement a Small Business Development Program that creates jobs by providing financial assistance in the forms of grants or loans to small businesses and microenterprises. These funds will be awarded on a competitive basis through HRD or a subrecipient of HRD. This assistance could include the following:

- Grants, loans, loan guarantees and other forms of financial support for the establishment, stabilization, and expansion of small businesses.
- Technical assistance, advice, and business services to small businesses.

Commercial Corridor Development

The plans to invest approximately \$5 million of CDBG funds over the next five years in the revitalization of neighborhood commercial corridors. The program’s comprehensive approach is designed to improve commercial corridors through façade improvements, streetscapes and other activities that support business development. Funds will also address vacant and abandoned buildings through acquisition,

construction, and rehabilitation of vacant and abandoned properties or installation of commercial or industrial buildings, structures and other real property equipment and improvements. Investments are expected to leverage new market tax credits and private financing. The overall benefits to residents in these communities include better access to goods and services available, healthier food options in their neighborhood and new jobs for Detroit residents.

Job Creation

The City's economic development team is focused on driving innovation and economic growth at an accelerated pace. The City plans to continue to maximize leverage and drive commercial and industrial growth by using some of the City's biggest assets. Detroit assets such as the Port, Detroit Wayne County Metro Airport and rail and trucking facilities provide mechanisms to continue job growth in these specific industries. Land use planning, industrial commercial development and housing and community development will be coordinated to drive population growth and job creation.

The City will also improve its capacity to retain and attract foreign-born residents to live and do business in Detroit by promoting immigrant civic engagement and ensuring improvements to the One Stop Shop to address the needs of immigrant businesses operating in Detroit.

Economic Development Public Services

Growing Detroit's Young Talent (GDYT)

DESC is a part of the Michigan Works Association! is the workforce development agency for the City of Detroit. Association. Through partnerships with community-based and faith-based organizations, foundations, and many others, DESC provides employers with access to the broadest talent pool in Detroit, and jobseekers with the widest range of job-related services.

DESC administers the GDYT Program each year and works with a multitude of partners. Eligible candidates are low-income youth ages 14-24, residing in the City of Detroit and having at least one predetermined barrier to employment. A wide range of summer job opportunities are available. Currently, there are over 30 partners that contribute to this program and over 548 worksites in the GDYT Program. Besides valuable work experience, some past employers have hired the youth into permanent employment. During the summer program youth are paid a stipend or hourly pay ranging from \$8.25 per hour to \$10.00 per hour and can work up to 120 hours during the program.

Early employment helps youth learn how to interact with employees, make connections for future opportunities and begin to build their skillset and resume. Employment in professional settings help youth understand the skills needed to prepare for the future and learn about different career options.

The 2020-2021 Annual Action Plan allocates \$1.5 million for one year, totaling \$7.5 million in CDBG funds over five years to fund the GDYT Program in partnership with both private businesses and nonprofit organizations. The program will provide job training, skill building, and employment opportunities for "at risk" and low-income youth to help them gain valuable workplace experience. Funds will be leveraged with private donations and federal grants. The number of jobs to be created will be determined based on program design and corporate commitments.

HUD Section 3

Recipients of certain types of HUD funding are obligated under Section 3 of the Housing and Urban Development Act of 1968, commonly referred to as Section 3, to provide training, employment, contracting and other economic opportunities, to the greatest extent possible, to low- and very low-income persons, especially recipients of government assistance for housing, and to businesses that provide economic opportunities to low- and very low-income persons. In addition, HUD requires that grantees make efforts to do outreach to minority owned, women owned, and disadvantaged businesses to increase equity and inclusion. Section 281 of the National Affordable Housing Act requires each participating jurisdiction to prescribe procedures acceptable to HUD to establish and oversee a minority outreach program. The City has a Section 3 Coordinator that oversees Section 3 compliance for HRD. The Section 3 Coordinator is responsible for ensuring compliance is achieved with the following funds: CDBG Funds, HOME Funds, DDR Funds, Communities can build a talent pipeline to help with Section 3 compliance including a database of local qualified Section 3 residents and businesses, or they can use HUD's Section 3 registry. The City will help to create workforce development programs in construction skills through workforce development programs such as LISC's Financial Opportunity Center model. These neighborhood-based programs serving low-income residents can become a referral source for construction labor. The City can also establish or use existing small business lending programs for those needing bridge loans to take advantage of the Section 3 economic opportunities.

Section 7 - Previous Accomplishments

The City of Detroit met the accomplishments in the table below through the 2015 NRSAs. The accomplishments presented in the NRSA chart below are reflections of the benchmarks chosen—Improved Housing, Neighborhood Stabilization, Wealth Building, and Job Creation—to embark on Detroit’s journey to rebuilding our neighborhoods. Activities such as Growing Detroit’s Young Talent, Detroit Employment Solution’s Industry-Led Training, and Motor City Match highlight our pathways to continuous economic opportunity, growth, and general wealth of Detroit residents. Our Home Repair Loan, Lead Abatement, and Senior Emergency Home Repair Programs illustrate our commitment and value to Detroit residents and neighborhood stabilization. While there is no specific pattern to the data presented from 2015-2019, it is evident that each NRSA has a need under the chosen benchmarks. In the future expanding and continuing with these activities is essential if our goal is to serve low moderate income residents. This is already become apparent, as the success of Growing Detroit’s Young Talent has exemplified a greater need for workforce development in specific industries, hence the rise of Industry Led Trainings in 2019 and 2020. Our survey provided towards the end can be used as an additional tool to ensure that our strategy and benchmarks do in fact show qualitative improvements to our neighborhoods.

NRSA Accomplishments from 2015-2019

Improved Housing	Neighborhood Stabilization	Small Business Support	Job Creation	Public Services
<ul style="list-style-type: none"> Total number of houses repaired under the 0% Loan Program were 515 owner occupied units. Of that, 335 units were completed in NRSAs. 139 residents received Senior Emergency Repair program grants - \$3MM in CDBG funds 128 people were served with the Lead Abatement program - over \$2MM in CDBG funds 	<ul style="list-style-type: none"> 9,223 residential demolitions were completed in NRSAs 344 commercial demolitions were completed in NRSAs 	<ul style="list-style-type: none"> 263 businesses were assisted that were located within the NRSAs 321 property owners addressed exterior violations 50 businesses received technical assistance to help advance business ideas 	<ul style="list-style-type: none"> Over 15,000 Detroit youth received employment preparation City Wide 281 adults were placed in permanent jobs and over \$1MM in CDBG funds spent to support job placement 	<ul style="list-style-type: none"> Home repair loan applicants who were denied received CWF services such as financial counseling & credit repair 4,027 youth received summer jobs and over \$5MM in CDBG funds spent

Section 8 - Proposed 2020 -2024 NRSA Plan

8.1 Housing Development

The City is implementing a multi-pronged approach to stabilize neighborhoods using the benefits and flexibility afforded through the NRSAs. The City will allocate funding to NRSA related activities annually. Several initiatives such as auction of publicly owned residential properties, sale of vacant lots, aggressive code enforcement and an expansive demolition effort will work together to stabilize neighborhoods. The City's home repair loan program and continuance of the much-needed emergency repair and lead abatement programs will further stabilization efforts. Small business assistance to create or retain jobs will be part of the strategy. Public services activity in the form of summer youth employment funded from CDBG above the 15 percent cap will be facilitated through community-based development organizations (CBDOs). Homeownership assistance can be provided using CBDOs.

8.2 Small Business Growth and Attraction

The City plans to invest approximately \$1.5 million each year in a small business and commercial corridor revitalization program. HRD will work with partners and various City staff to utilize a variety of approaches and tools to attract new small business investments, retain and expand existing small businesses and improve the physical environment along commercial corridors. To ensure the maximum leverage of funds, consideration and prioritization will be based on the SNF boundaries. As illustrated in Appendix A of this application, there are ten (10) SNF neighborhoods located within the City. Of those ten (10) neighborhoods, seven (7) SNF neighborhoods are within the NRSA boundaries.

8.3 Job Training and Placement

DESC has an annual goal of providing basic career services – both virtually and in-person – to approximately 40,000 persons each year. DESC provides a list of services to job seekers including providing individualized longer-term services such as PATH, WIOA and FAE&T, enrolling eligible job seekers into occupational training, enrolling people into High School Completion or Equivalency program, and provide 5,000 eligible job seekers the option of participating in in-person job-readiness or job search training workshops.

Through continued partnerships with community-based and faith-based organizations, foundations, and many others, DESC provides employers with access to the broadest talent pool in Detroit, and jobseekers with the widest range of job-related services.

8.4 Youth Employment

The City will invest in summer jobs youth training program in partnership with private businesses and nonprofit organizations as described in Section VI. The use of the NRSA for this CDBG public service allows more youth to be served because the CDBG public services cap of 15% is waived in the NRSAs for services provided by community-based development organizations (CBDOs). Public service must be a new service or an increase in services.

Section 9 - 2020-2024 Performance Management Benchmarks

This section establishes benchmarks for the activities in this plan. In accordance with HUD regulations, the City will report its accomplishments against its benchmarks in the Integrated Disbursement and Information System (IDIS) on a quarterly basis. The specific estimates listed below will be entered into HUD's Integrated Disbursement and Information System (IDIS) under the accomplishments screens:

- LMA Accomplishment – LMASA – low/moderate area benefit, NRSA
- LMH Accomplishment – LMH - low/moderate housing benefit, NRSA

The City will work with stakeholders and residents each program year to assess the previous year's NRSA accomplishments versus the proposed goals and objectives identified in this Plan. The Economic Development team will work with the Reporting and Compliance team to solicit input from affected residents and stakeholders - and to assess the subsequent program year's goals and objectives and amend, if necessary.

The City will also identify the benchmarks in its Annual Action Plan that it expects to achieve for each program year. The City will also report its progress at the end of each program year in its Consolidated Annual Performance Evaluation Report (CAPER). Over the five-year period of the strategy, the City will work to accomplish the benchmarks in the table below against its NRSA objectives:

- A. Affordable Housing Priority Objectives -NRSA may include:
 - Improve quality of housing stock
 - Expand homeownership opportunities
 - Increase the supply of decent affordable housing
 - Increase public improvements, demolition, and infrastructure improvements

- B. Economic Development Priority Objectives -NRSA may include:
 - Create and retain LMI jobs
 - Expand workforce development opportunities for low – to moderate – income youth
 - Develop commercial properties and façade improvement

Affordable Housing	Objective	Strategy	Goal		Year 1	Year 2	Year 3	Year 4	Year 5	Total	
	Improve quality of housing stock	Home repair loan program	Housing units repaired	NRSA 1	10	15	15	20	15	75	
					NRSA 2	18	18	16	14	9	75
					NRSA 3	10	10	20	20	15	75

			NRSA 5	100	100	100	100	100	500	
		Total	860	760	760	760	860	4000		

9.1 Monitoring

HRD staff will be responsible for monitoring the performance of subrecipients and developers undertaking activities in each of the NRSAs and compare that to the NRSA objectives and goals proposed in the 2020 – 2024 NRSA Application. HRD staff will work with various divisions and departments within the City, partnering agencies and stakeholders to understand projects that have been completed in the NRSAs, funds that were used to undertake the project and the amount of money that was leveraged for each project.

The first part of the City’s NRSA monitoring will consist of ensuring that goals and objectives are clearly outlined in each CDBG agreement related to the NRSAs. Each subrecipient, CBDO or contractor that undertakes work in a NRSA with CDBG funds will be responsible for reporting to HRD on a quarterly basis on projects completed. These reports will be sent to the Economic Development NRSA Coordinator no later than the (15th) day of each quarter. Listed below are the dates that reports are required to be sent to HRD:

- January 01 – March 30; Report due no later than April 15th
- April 01 – June 30; Report due no later than July 15th
- July 01 – September 30; Report due no later than October 15th
- October – December 31; Report due no later than January 15th

The quarterly reporting will allow HRD to review the proposed activities under the NRSA Plan and assess whether or not the activities are meeting the goals of the NRSA Plan. Each year during the Annual Action Plan planning process, the Economic Development team will work with the Reporting and Compliance team to make sure that the NRSA goals and objectives are reasonable and on track to meet the overall goal that is identified in this Plan. If the quarterly numbers are showing a significant increase or decrease in the number of people being served, the City will address this in the CAPER as well as make the adjustments in the subsequent Annual Action Plan. Once this information is collected and reviewed, this

information will be given to the Director of Reporting and Compliance so that this information will be shared with HUD.

In addition to this, the City will reach out to any subrecipient who undertakes CDBG in the NRSA and provide a risk assessment. Based on the risk assessment performed, the City will then do an on-site monitoring or continue to perform desktop monitoring, which is completed each time a payment request is submitted to HRD. The City will use the NRSA HUD Monitoring Checklist (see attached) as their guide when monitoring subrecipients. In addition, there will be staff training on NRSA monitoring so that the monitoring process is streamlined and HRD is collecting the same information. HRD will also utilize Exhibit 3-16 named Guide for Review of Subrecipient/Community-Based Development Organization (CBDO Management), which can be found at CPD Monitoring Handbook (6509.2) | HUD.gov / U.S. Department of Housing and Urban Development (HUD).

Once this information is collected and reviewed, this information will be given to the Director of Reporting and Compliance so that this information will be shared with HUD and included in each reporting year CAPER.

In addition, at the beginning of each program year, the City's monitoring staff will conduct a risk assessment on each subrecipient or other partner that undertakes CDBG activities in the NRSA. City staff will use Notice CPD-14-04: Implementing Risk Analyses for Monitoring CPD for FY 2015 and 2016 (hudexchange.info) on Entities that have a high-risk assessment will be monitored more closely and frequently, and at least one on site monitoring visit will be conducted. Lower risk entities may not be monitored onsite. Based on the risk assessment performed, the City will then do an on-site monitoring or continue to perform desktop monitoring, which is completed each time a payment request is submitted to HRD. The City will use HUD Exhibit 3-16 named Guide for Review of Subrecipient/Community-Based Development Organization (CBDO Management) when performing on-site monitoring on an annual basis. See link to CPD Monitoring Handbook: CPD Monitoring Handbook - 6509.2 - HUD Exchange.

See Attachment H for the HUD Monitoring Checklist Guide that will be used to monitor the implementation of the NRSA.

In addition to this, the quarterly reporting will allow HRD to review the proposed activities under the NRSA Plan and assess whether the activities are meeting the goals of the NRSA Plan. The City will include these assessments in the annual CAPER and will post them on the City's Website as well as make possible changes to the following program years funding recommendations.

Section 10 - Strategic Partnerships

Strategic partnerships are paramount to ensuring the City of Detroit has the capacity to implement the strategies described in Section VI and achieve the identified performance measures in Section IX. The City is working with numerous agencies including those listed below to implement the strategies outlined here.

10.1 Detroit Local Initiative Support Corporation (LISC)

Detroit LISC and its national office have assisted the City in designing the home repair loan program. LISC raised \$5 million in private investment to leverage \$6.6 in CDBG funding to start the zero-interest home loan program, Detroit HELP. The Detroit LISC office will provide ongoing management of the loan fund and oversight of the other community partners. In addition, LISC will serve on the Loan Review Committee and the Program Steering Committee.

10.2 Other Community Financial Institutions

Several community financial institutions in the City of Detroit will serve as loan originators. They will process and approve applications, invest in the mortgage loan fund and service loans.

10.3 Community Development Organizations (CDOs)}

CDOs, including the Centers for Working Families, will support DHELP by conducting community outreach to generate applicants for the loans, serving as a repository of information on the program and assisting homeowners with completing the applications. Based on the experience of local lenders, securing complete loan packages from applicants is a significant hurdle, which will be reduced by this support.

DBA

The City of Detroit Building Authority (DBA) assists City Departments in carrying out their capital improvement programs and real estate management. In addition, the DBA is overseeing all demolition activities.

EDC & DEGC

The DEGC works closely with the City of Detroit and other partners to support existing businesses and to bring new companies and investments to the City. The professionals who work for DEGC act as staff for several public authorities and whose board members are appointed by the Mayor and approved by Detroit City Council. Each of those entities have distinct responsibilities and powers, but they are very closely related. DEGC also works directly for the City of Detroit under contract and manages economic development efforts funded by private and foundation contributions, grants, and contracts.

Michigan Economic Development Corporation

The Michigan Economic Development Corporation (MEDC) through its Michigan Main Street program has designated several Detroit business districts and commercial corridors for participation in the program. The program provides technical assistance and other resources to Main Street to help them with revitalization efforts that attract residents, business investments, economic growth, and job creation.

10.4 Community Based Development Organizations (CBDOs)

As outlined in HUD Notice CPD-96-01 and using the criteria for CBDO designation at 24 CFR 570.204 and 570.207(b)(3)(iii), the City of Detroit may use CBDOs to support certain public service, new construction of housing, homeownership assistance, and community economic development activities in the designated NRSAs. The City has elected to use CBDOs to undertake activities such as the GDYT Program. The use of CBDOs in HUD-approved NRSAs will not be counted against the 15 percent public service cap requirements for such public service activities. The City is considering the following strategies to engage CBDOs on its investment strategy:

Using a fiduciary agency to manage CBDOs in each NRSA

The City of Detroit proposes to designate eligible organizations that meet the requirements at 570.204(c) in the proposed NRSAs. To avoid the administrative burden on HRD, the City may identify and select a fiduciary agent to manage the CBDOs and CDBG funds in the NRSAs that will be carrying out the GDYT or similar youth summer job programs.

Certifying CBDOs with target areas that include or are coterminous with the NRSAs

The CBDO provisions at 570.203(c) require that a CBDO must have a defined geographic area of operation. The NRSAs may include or be a part of a CBDO's target area(s). The City is proposing that CBDOs that are working within areas that include or are coterminous with NRSAs may expand their areas to include the NRSAs. The CBDO

will be then able to work within the NRSAs. Also, since CBDOs are authorized to primarily operate in an identified area, there is a limited allowance for services to persons outside of the identified area. The regulations do not preclude such a strategy.

Use of a CBDO in Multiple NRSAs

CBDOs may serve a large or multiple NRSAs while maintaining “local control” through its board membership.

Recruitment of CBDOs

CBDOs may be identified to partner with the City through several means. In 2019 HRD, in partnership with the Office of Development and Grants (ODG), updated the CBDO Application for interested organizations to apply. The City will allow interested organizations the opportunity to apply on a rolling basis to be CBDO approved and will be eligible for NRSA CDBG funding. The beginning of each calendar year, HRD staff will review the approved CBDO list and check for compliance by reviewing the board makeup of the organization, discussions with organization staff, and obtaining LMI certifications (if applicable) for board members. If the CBDO still qualifies after the compliance check, they will continue to be on the approved CBDO list for the City. This does not guarantee an organization CDBG funding – however, this allows organizations to apply for CDBG that is otherwise capped or restricted per HUD regulations.

HRD has previously certified and used CBDOs to carry out new construction of housing as authorized under 570.204 (a). In addition to this, Community Housing Development Organizations (CHDOs) often have the same makeup that a CBDO has; the City will review HRD approved CHDOs to see if any CHDO qualifies as a CBDO. If a CHDO qualifies as a CBDO as well, the City will reach out to the CHDO to determine if the organization is interested and has the capacity to carry out CBDO eligible activities located in the NRSAs.

Section 11 - Current Leveraged Resources in NRSAs

There are several projects and programs that the NRSAs will be able to leverage. These include government initiatives, capital improvements, foundation-funded programs, and private investment. This section identifies some of the current key non-federal governmental and private sector funding and projects that are available to be leveraged in the NRSA.

It is well recognized that the amount of federal grants received is inadequate to address the housing and community development needs of the City’s low- and moderate-income households and communities. The City of Detroit has pursued a deliberate strategy of seeking out other public and private sector partnerships to leverage its federal funds with private capital and other government sources to expand the impact of its grant funded activities. The table below labeled **Leveraged Resources and Intended Outcomes** identifies initiatives and intended outcomes based on the area (City Wide and/or NRSA) that the City intends to leverage within the five (5) NRSAs. The initiatives described below are how the City plans to achieve its housing and community development goals.

11.1 Historic Tax Credits

The federal historic rehabilitation tax credit (HTC) program is an indirect federal subsidy to finance the rehabilitation of historic buildings with a 20 percent tax credit for qualified expenditures. Before the enactment of tax reform legislation at the end of 2017, there was also a 10 percent non-historic rehabilitation tax credit for pre-1936 buildings. These Federal tax incentives are used to stimulate private investment in the rehabilitation and reuse of historic structures.

11.2 The Michigan Low-Income Housing Tax Credit Program (LIHTC)

The Low-Income Housing Tax Credit Program is an investment vehicle created by the federal Tax Reform Act of 1986 to increase and preserve affordable rental housing. Administered by the Michigan State Housing Development Authority (MSHDA), this program permits investors in affordable rental housing to potentially claim a credit against their tax liability annually for a period of 10 years, bringing much needed private investment to affordable housing projects. The City provides funding for projects receiving low income housing tax credits from MSHDA. This consists of HOME assisted projects receiving 9% competitive tax credits and an allocation of 4% credits through the City's Affordable Housing Leverage Fund (AHLF) which is administered by the Detroit office of Local Initiatives Support Corporation (LISC). See below.

In FY 2018, two housing projects that received 9% competitive LIHTC allocations were Pablo Davis II (\$451,066) and The Sanctuary (\$800,000). Three additional projects in the City received increased credits for existing LIHTC projects, The Anchor at Mariners Inn (\$1,300,000); Benjamin O. Davis Veterans Village, (\$1,178,471), and La Joya Gardens (\$811,553).

11.3 Bank of America and Quicken Loans/Local Initiatives Support Corporation

Bank of America (BoFA) provides private capital through Local Initiatives Support Corporation, a national community development financial intermediary (CDFI) with a local office in Detroit, for the City of Detroit's 0% Home Repair Loan program. These private funds are matched dollar for dollar with the City's CDBG funding to provide necessary 0% interest home repair loans to eligible LMI homeowners citywide. In 2019, BoFA provided \$1.5 million in funding to this effort and as of March 2020, has provided a total of \$6,700,000 in private capital to date. In 2019, Quicken provided \$1 million to support lead-based repairs, loan capital and administrative costs for the 0% Home Repair Program. In addition, Bank of America provided a \$1 million operating grant to "Invest Detroit" to support its expansion of the SNF.

11.4 Strategic Neighborhood Fund

The Strategic Neighborhood Fund is a partnership between the City of Detroit, Invest Detroit, local neighborhood residents, and philanthropic and corporate donors. The SNF was started with a \$35 million pledged from a group of seven area banks and major corporations to fund community improvements in the City's seven Strategic Neighborhood Fund areas. SNF funds community-driven projects in four specific areas – park improvements, streetscape improvements, commercial corridor development, and affordable single-family home stabilization through renovation of existing vacant units and new construction as needed over ten (10) different neighborhoods within the City. Each project begins by soliciting input from residents with support and oversight from the City's Planning and Development Department and the Department of Neighborhoods.

Additionally, \$56M in Philanthropic grants will be combined with \$59M in City funds and \$15M in State of Michigan funds for a total of \$130M. This funding commitment will attract an additional \$113M in equity and commercial debt for a total of \$243M in total investments to improving some of Detroit's most impacted communities. The ten (10) neighborhoods are identified below:

- 1) Livernois-McNichols
- 2) Grand River Northwest
- 3) Warrendale/Code-Rouge
- 4) Campau & Banlatown
- 5) Islandview & Greater Villages
- 6) Jefferson Chalmers
- 7) East Warren & Cadieux

- 8) Gratiot/7-Mile
- 9) Russell Woods & Nardin Park
- 10) Southwest Vernor

11.5 The Preservation Housing Partnership

The City of Detroit Housing & Revitalization Department (HRD) has partnered with six (6) housing focused organizations to preserve and improve existing affordable housing throughout the City and prevent displacement of LMI residents due to gentrification and/or conversion of affordable units to market rate. Teaming up with organizations such as Cinnaire, Enterprise Community Partners, United Community Housing Coalition, Data Driven Detroit, Community Investment Corp., and others, this effort will focus on maintaining affordable units either through the renewal of existing affordability commitments or through restructured financing mechanisms and will provide necessary renovations to ensure the availability of quality, long-term affordable units.

11.6 Affordable Housing Leverage Fund (AHLF)

Affordable housing is central to the City's inclusive growth strategy and plays a key role in the ability to retain existing residents, attract new residents, and create mixed-income communities. To address its affordable housing needs, the City's Housing & Revitalization Department (HRD) partnered with Detroit LISC, the Michigan State Housing Development Authority (MSHDA), along with local financial institutions and foundations to create the Affordable Housing Leverage Fund (AHLF). The AHLF provide affordable housing developers and owners with streamlined access to financial products such as loans, grants, and guarantees that are specifically designed to address housing challenges in Detroit neighborhoods. AHLF encourages the preservation of regulated and naturally occurring affordable housing citywide and the development of new mixed-income and affordable housing in targeted multi-family housing areas. The City has committed to investing \$50 million in CDBG, HOME, and general funds in coordination with AHLF and is coordinating state, philanthropic, and private commitments with the goal of and intention to grow the fund with philanthropic and financial institutional support to \$250 million, which will unlock \$765 million in total investment. The AHLF is expected to preserve 10,000 units of existing affordable housing and the development of 2,000 units of new affordable housing.

AHLF primarily finances affordable multi-family rental housing that is affordable to households at or below 80% AMI. Recognizing that housing cost burdens are a particularly acute challenge for residents at the lower end of the income spectrum, AHLF will invest in several homes for households below 50% and 30% of AMI as well as permanent supportive housing.

11.7 Choice Neighborhoods

The City plans to apply for approximately \$30 million on a HUD CNI Implementation Grant that is due in December 2020. The Choice Neighborhoods program leverages significant public and private dollars to support locally driven strategies that address struggling neighborhoods with severely distressed public and/or HUD assisted housing through a comprehensive approach to neighborhood transformation. The proposed application involves the implementation of a comprehensive Transformation Plan in Greater Corktown to revitalize the neighborhood while preserving affordability and increasing access to opportunity for existing residents. Greater Corktown has a history of high vacancy and long-term disinvestment but has recently seen emerging development activity spurred by Ford Motor Company's investment in the former Michigan Central Station and surrounding area. Given this context, the City engaged in an in-depth neighborhood planning process, to ensure that the Transformation Plan reflects the needs and priorities of existing residents. The vision for the neighborhood involves creating high-quality affordable and mixed income housing options, including opportunities for homeownership across the income spectrum, as well as targeted investments in neighborhood and people to support long-term stabilization.

11.8 Housing Resource Centers

Housing Resource Centers (HRC) are accessible, community-based sites administered by nonprofit housing counseling organizations that will serve as residents' first point of contact to address a range of common housing stability challenges. The HRC model is an integrated service model built on a housing counseling platform; once the housing counseling relationship is established between the HRC organization and the resident, the HRC navigates the resident through the process of accessing housing stability programs including tax foreclosure prevention, mortgage foreclosure prevention, home repair program assessment and application, utility assistance & weatherization programs, title management, and other public/nonprofit programs. For residents seeking to become homeowners, services may include homeownership counseling, credit repair, identification of homebuyer supports (down payment assistance, etc.), and identification of quality purchase options. The HRC network is facilitated by a central Network Manager organization, which supports the model with data collection and reporting, training and technical assistance, best practice sharing, referral system development, and performance.

This City is launching the HRCs in 2021 with philanthropic funds at first. The City is also using CDBG-CV dollars to add housing counseling capacity in response to the increased need for housing security. However, the model assumes a combination of CDBG and private funding moving forward. The function of HRC align with HUD's definition of Housing Counseling in 24 CFR 5.100, but with tighter service delivery, referral, follow-up, and data management.

Leveraged Funding and Intended Outcomes Table

Project Name	Brief Description	Budget \$	Agency or Organization	Timeline	Outputs	Investment Area:	Website
Strategic Neighborhood Fund (SNF)	SNF is a 5-Year strategic investment that will target ten (10) neighborhoods within the City including the following neighborhoods: 1) Livernois-McNichols; 2) Grand River Northwest (NRSA 2); 3) Warrendale/Code-Rouge (NRSA 4); 4) Campau & Banlatown (NRSA 2); 5) Islandview & Greater Villages (NRSA 1); 6) Jefferson Chalmers (NRSA 1); 7) East Warren & Cadieux; 8) Gratiot/7-Mile (NRSA 2); 9) Russell Woods & Nardin Park (NRSA 3); 10) Southwest Vernor (NRSA 3)	\$171M – Strategic Neighborhood Fund, Affordable Housing Leverage Fund	City of Detroit; Invest Detroit,	2017-2022	Catalyze ten (10) vibrant neighborhoods beyond the greater Downtown Improve walkability on major corridors Increase the number of affordable housing units within each NRSA	NRSAs 1-5; City Wide	https://detroitmi.gov/departments/planning-and-development-department/neighborhood-plans

City of Detroit Capital Improvement Projects

Project Name	Water and Sewerage Capital Improvement Program
Description	The Detroit Water and Sewerage Department (DWSD) launched a Capital Improvement Program (CIP) for FY 2018 through FY 2022, the largest in decades, will provide water and sewer system improvements and maintenance. The effort to upgrade Detroit's systems also reflects the city's mission to put more Detroiters to work through projects being required to hire 51% Detroit residents under Executive Order 2016-1. The DWSD is almost half-way to its goal. Since the program launched in 2018, DWSD has repaired or replaced 25 miles of water main, 22 miles of sewer collection piping and 173 lead service lines.
Resources Involved	The DWSD is funded by \$500 million over five years from the city's utility tax.
Timeline	From FY 2018 and completion by FY 2022
Source	https://detroitmi.gov/departments/water-and-sewerage-department/dwsd-projects/capital-improvement-program
Project Name	Cornerstone Village and North Rosedale Park
Description	Cornerstone Village and North Rosedale Park are the first two neighborhoods to get the comprehensive upgrades as part of \$500M capital improvement program. In March 2020, Mayor Mike Duggan and the DWSD announced the first-ever neighborhood-wide construction projects to upgrade both the water and sewer systems. Activities include new water main, sewer lines & lead service line replacement. This project is in NRSA #5
Resources Involved	\$44.3M Million over 3 years. Funding is from City of Detroit Water and Sewerage Department
Timeline	<ul style="list-style-type: none"> Start: Spring 2019 End: December 2021
Source	Detroit Water and Sewerage Department https://detroitmi.gov/news/dwsd-breaks-ground-first-ever-neighborhood-wide-projects-upgrade-both-water-and-sewer-systems

Small Business Support

Project Name	D2D – Detroit Business 2 Business
Description	<p>The D2D program has tremendous potential to increase jobs and investment in Detroit. In its first year, the program accomplished several important steps to develop the program:</p> <ul style="list-style-type: none"> • Completed the "Major Purchaser's Survey" local procurement opportunity analysis with 22 of Detroit's major companies. • Recruited over 300 suppliers. • Partnered with the State to produce "Pure Michigan Business Connect" B2B database and loaded 425 companies into the system.
Resources Involved	Technical assistance
Timeline	Ongoing
Source	http://www.degc.org/
Project Name	ProsperUS
Description	<p>The ProsperUS Detroit Lending Program provides access to capital for start-up and existing small businesses that otherwise might not have access through traditional sources. Graduates of ProsperUS Detroit's entrepreneur training program, who intend to locate their business in one of five target neighborhoods, are eligible to apply for small business loans.</p> <p>All five NRSAs include a ProsperUS target area.</p>
Resources Involved	ProsperUS Detroit provides financing up to \$15,000 for start-up businesses and up to \$25,000 for existing businesses with funding from foundation support.
Timeline	Ongoing
Source	http://www.prosperusdetroit.org/

Project Name	Procurement Technical Assistance Centers (PTACs)
Description	<ul style="list-style-type: none"> The PTACs of Michigan are not-for-profit organizations. The PTACs ensure a broad base of capable suppliers for the defense industry and other agencies, thereby increasing competition, which supports better products and services at lower costs. The mission of the PTACs of Michigan is to enhance national defense and economic development of the State of Michigan by assisting Michigan businesses in obtaining and performing on federal, state and local government contracts.
Resources Involved	Funding provided by the Defense Logistics Agency (DLA), the Michigan Economic Development Corporation (MEDC) and local funding partners.
Timeline	Ongoing
Source	http://www.michigantac.org/
Project Name	Small Business Development Center (SBDC)
Description	The SBDC provides no cost business counseling, low cost business workshops and market research to our clients. Assistance includes drafting business proposals, assistance/review of financial statements and projections, marketing and expansion, etc.
Resources Involved	Small Business Administration
Timeline	Ongoing
Source	http://www.sbdcmichigan.org/
Project Name	Neighborhood Business Associations
Description	There are several business associations located in the NRSAs. These include Jefferson East Business Association (NRSA 1), Osborn Business Association (NRSA 2), and Southwest Detroit Business Association (NRSA 3). There are also several community development corporations (CDC) that provide support to local businesses such as Grandmont-Rosedale CDC (NRSA 5) and Focus Hope (NRSA 4).

Neighborhood Revitalization

Project Name	Detroit Commercial Corridor Support
Description	<p>Commercial corridor support in Detroit neighborhoods including the five NRSAs through several sources:</p> <ul style="list-style-type: none"> • The Detroit Economic Growth Corporation (DEGC) provides partially forgivable loans to businesses to help them to remain financially stable during related periods of reduced revenues such as in the Livernois streetscape improvements area and the COVID-19 pandemic. • Detroit LISC/Michigan Main Street Program/Vanguard Community Development Corporation – Milwaukee Junction/North End Business District - North End neighborhood of Detroit was selected to participate in “Select Level” of the Michigan Main Street Program. As part of the Program, the community will receive five years of intensive technical assistance from Michigan Economic Development Corporation (MEDC) with a focus on revitalization strategies designed to attract new residents, business investments, economic growth, and job creation. The commercial corridor is in NRSA #3. • A LISC loan of \$700,000 helped transform the aging 38,000 square foot Dodge Building in Milwaukee Junction with a series of industrial spaces for small and mid-sized creative and production firms. The commercial corridor is in NRSA #3. • Michigan Avenue/Southwest Business District – Detroit LISC is providing support to the business district including industrial re-use strategy, loans, grants, and technical assistance to revitalize the area to attract new residents, business investments, economic growth, and job creation. The commercial corridor is in NRSA #__.

Private Investment Projects

Project Name	Michigan Central Station Revitalization Project
Description	The derelict old Michigan Central Station which has been closed for decades is one of the City's premier revitalization project and is in a NRSA 5. The Ford Motor Company purchased the station and developed a plan for its revitalization as part of its Corktown campus. The station contains 650,000 square feet of space out of Ford's total 1.2-million-square-foot inventory in Corktown.
Investment	Ford's entire Corktown campus consisting of several buildings will cost somewhat more than \$700 million. The train station itself is costing \$350 million to renovate.
Source	https://corporate.ford.com/operations/locations/corktown.html
Project Name	Detroit Manufacturing Systems LLC (DMS)
Description	Detroit Manufacturing Systems LLC plans to expand its Detroit through the Business Retention & Expansion (BR&E) program – part of DEGC's Economic Development and Investment Services Team. The expansion will include repurposing its existing 482,000 sq.-ft. manufacturing facility and expanding to occupy an additional 60,000 sq.-ft. This new project will bolster new training initiatives as well as a workforce addition of approximately 225 new jobs.
Investments	<ul style="list-style-type: none"> Total Investment: \$31.9 million Michigan Strategic Fund \$1.5 million Jobs Ready Michigan Program grant
Timeline	Starts in FY 2020-2021
Source	https://www.degc.org/detroit-manufacturing-systems-continues-to-support-detroits-business-community/
Project Name	Henry Ford Health System Neighborhood Development Projects
Description	Henry Ford Health Systems has engaged in a multi- million investment strategy for the New Center Neighborhood in NRSA 3. Projects include an 187,000 square foot Cancer Center, a 55,000 square foot modern medical laundry facility, and the ArtBlock, an arts -centric community center. Henry Ford invested in the Motown Museum expansion, and the William Clay Ford Center for Athletic Medicine. According to a recent online article, <i>"Henry Ford and its partners are committed to working with community groups and workforce agencies to tap into the talent present within the surrounding neighborhoods, and develop training and support programs that will present opportunities for advancement."</i>
Investments	<ul style="list-style-type: none"> Total Investment: \$290 million in five projects
Timeline	Projects are scheduled for completion in FY 2020-2021

Attachment D: Community Survey Data Questions

A. Neighborhood Revitalization Areas (NRSAs)

The City of Detroit intends to renew its Neighborhood Revitalization Strategic Areas (NRSAs) with HUD. This will allow the City to continue to better leverage private investment with CDBG funding in defined areas and increase the impact of these investments. Specific benefits of NRSAs include the following:

- Greater flexibility in using CDBG funds to create and retain jobs.
- Allowing the use of CDBG housing assistance to a wider variety of income groups with at least 51% of units assisted benefiting low- and moderate-income persons.
- Community economic development and neighborhood revitalization activities
- Greater flexibility in providing public services in the NRSAs.

1. What investments and/or community lead initiatives are happening in your neighborhood that targeted investment in housing, public services, and commercial development would support?

2. Please state below what you see as the greatest need in your neighborhood in each of the following categories:

- Types of housing: _____
- Types of economic development: _____
- Public services: _____
- Neighborhood revitalization: _____

3. How could the City improve services to you or your neighborhood?

B. In your opinion, what are the top FIVE challenges and barriers to meeting the housing and community development needs of the City's low-to-moderate income communities in order of importance from 1 being most important? Please select below.

- Lack of public facilities including parks and recreational facilities
- Availability of capital and funding
- Availability and preservation of affordable housing

- Small business and microenterprise support
 - Income equality and inclusion including access to city contracting opportunities
 - Resident engagement and empowerment
 - Neighborhood and housing conditions
 - Need for home repairs especially for elderly persons
 - Crime and safety
 - Need for non-profit capacity building
 - Inadequate Services (including for seniors, youth, crime prevention, childcare, health, education, victims of domestic violence, etc.)
 - Inadequate Economic Development (including capital, facade improvement, job creation, training etc.)
 - Inadequate Services and housing for special populations including the mentally ill, elderly, persons with disabilities and substance abuse issues, etc.
 - Other housing and community development needs not mentioned above (Please specify below)
-

C. Thank you for your responses so far. Please answer the following questions about yourself:

1. How would you describe yourself? **Please select all that apply.**

- | | | |
|---|---|---|
| <input type="checkbox"/> Caucasian or White | <input type="checkbox"/> Black or African American | <input type="checkbox"/> Asian American |
| <input type="checkbox"/> American Indian or Alaskan Native American | <input type="checkbox"/> Hawaiian or Other Pacific Islander | <input type="checkbox"/> Multi-racial |
| <input type="checkbox"/> Other (Please specify) _____ | <input type="checkbox"/> Prefer not to answer | |

2. Are you of Hispanic, Latino, or of Spanish origin? (Please circle your answer.) **Yes / No / Prefer not to answer**

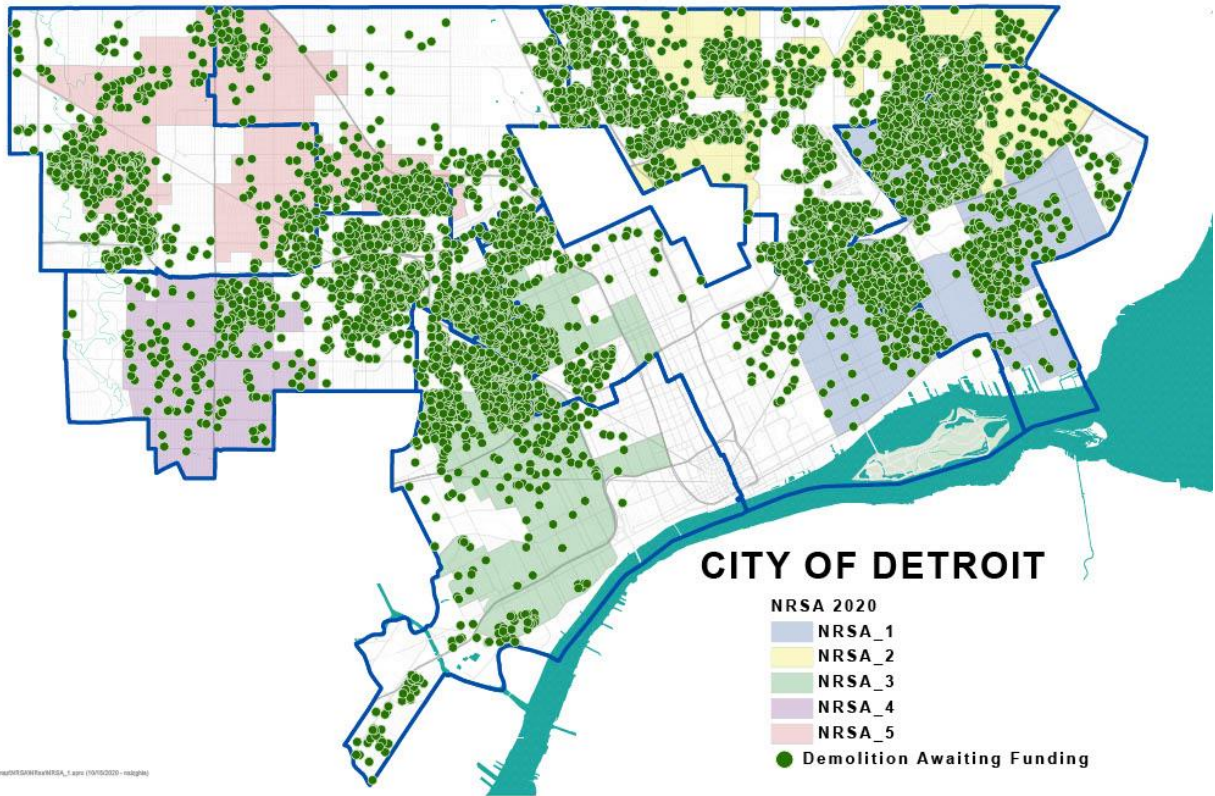

3. Do you or anyone in your household have a disability? (Please circle your answer.) **Yes / No / Prefer not to answer**

4. How many people live in your household (including yourself)? (Please select only one response.)

- | | | | |
|-------------------------|-------------------------|-------------------------|------------------------------|
| <input type="radio"/> 1 | <input type="radio"/> 2 | <input type="radio"/> 3 | <input type="radio"/> 4 |
| <input type="radio"/> 5 | <input type="radio"/> 6 | <input type="radio"/> 7 | <input type="radio"/> Over 7 |

4b. How many people in your household are under the age of 18 years old? ____

CITIZEN PARTICIPANTS
49 individuals

Location: City of Detroit, Department of Neighborhoods,
District 3 and 4 - Virtual Community Engagement Meeting
Detroit, MI 48226

Date & Time: August 25, 2020, 6:00 pm – 7:00 pm

Summary:

The Housing & Revitalization Department (HRD) staff conducted the virtual public hearing. The 2020 – 2024 Consolidated Plan, 2020 Annual Action Plan and the new NRSA boundaries was presented by Mr. Duncan and Corporate FACTS. In addition, the Annual Action Plan process, the prior year 2019 grant expenditures, actual CDBG/NOF sub-recipient awards, program descriptions, goals and accomplishments were presented. Citizens were given the opportunity to comment and present their opinions regarding the 5-year Consolidated Plan and new NRSA boundaries. The PowerPoint presentation was made available to the public on the City of Detroit, HRD website.

There were 49 individual citizens and HRD staff in attendance. There were 3 citizens that had questions/comments.

Question/Comment 1:

I want to find out about the NRSA application to determine what goes on in the community? What type of services and resources that you can provide? What is the project approval and proposal process? Is there any age requirement for the single family home repair?

Response to Question/Comment 1:

You can apply for funding. They're really one in the same. It's just that some of the resources are targeted towards NRSA, for example, the home repair program is eligible for all low income housing households across the city, but in those in NRSA areas non low income households could apply, but they are one in the same.

The senior home repair program that program is for seniors who are 62 years of age or older or 55 with a disability. The zero percent there is not an age requirement for that one. Our lead hazard program just requires you to have somebody under the age of six years old in your house. And if you're interested in any of those programs you can email us at HRDhomerepair@detroitmi.gov.

Question/Comment 2:

What does NRSA stand for? What does CDBG stand for? Are the grant funds available now? Are the grant funds for just for a district or the entire city? Are the grant funds available to people who are renting, who have a terrible things going on that a landlord won't fix in their house?

Response to Question/Comment 2:

A Neighborhood Revitalization Strategy area (NRSA) is a HUD designation that a city receives or ask for approval from HUD that allows them to target their resources and there's more flexible use of the CDBG funds under an NRSA designation. The Community Development Block Grant (CDBG) is one of the hub programs that the city receives grant funding to support community development activities and they receive about \$35 million a year in Community Development Block Grant funds.

This is an annual allocation. So the plan that we're developing now is for the next five years. This presentation and chart will be posted on the city's website. There is a chart that shows how much funding the city receives from HUD. The city receives about \$35 million in Community Development Block Grant funds. Those are the funds that have the most flexibility and provide the most variety of services. There's also about 7 Million that they receive annually in home money and it's just for housing and then 3 million in ESG is just for homelessness services and then 2.9 million is for housing opportunities for people with AIDS. A total about 50 million.

The Buildings and Safety Department is responsible for enforcing rental registration compliance and rental compliance. You may contact your District 3 Inspector.

Question/Comment 3:

Can you provide the email for HRD home repair information?

Response to Question/Comment 3:

The contact email for home repair is HRDhomerepair@detroitmi.gov.

District 1, 2, 5, 6 - Virtual Community Engagement Meeting
Detroit, MI 48226

Date & Time: September 2, 2020 6:00 pm –7:00 pm

Summary:

The Housing & Revitalization Department (HRD) staff conducted the virtual public hearing. The 2020 – 2024 Consolidated Plan, 2020 Annual Action Plan and the new NRSA boundaries was presented by Mr. Duncan and Corporate FACTS. In addition, the Annual Action Plan process, the prior year 2019 grant expenditures, actual CDBG/NOF sub-recipient awards, program descriptions, goals and accomplishments were presented. Citizens were given the opportunity to comment and present their opinions regarding the 5-year Consolidated Plan and new NRSA boundaries. The PowerPoint presentation was made available to the public on the City of Detroit, HRD website.

There were 166 individual citizens and HRD staff in attendance. There were 16 citizens that had questions/comments.

Question/Comment 1:

Can you provide a direct link of the NRSA map that will show the area around the new NRSA boundaries? I want to look at the map on my own to actually see the boundaries.

Response to Question/Comment 1:

The NRSA map will be posted on District 7 website. District 7 Facebook page will have a recording of the meeting. All District managers will be able to share link with residents. The PowerPoint presentation on an overview of the Consolidated Plan/Action Plan and our NRSA map information can be found on the City's website at: www.detroitmi.gov/hrd. We also, can email you all of the information on this hearing and all future hearings upon your request.

Question/Comment 2:

Can you provide the presentation and a map of new NRSA area? Last time my area was not in the NRSA area; we were just right outside of the designated area.

Response to Question/Comment 2:

The NRSA map will be posted on District 7 website. District 7 Facebook page will have a recording of the meeting. All District managers will be able to share link with residents. The PowerPoint presentation on an overview of the Consolidated Plan/Action Plan and our NRSA map information can be found on the City's website at: www.detroitmi.gov/hrd. We also, can email you all of the information on this hearing and all future hearings upon your request.

Question/Comment 3:

Previously in the NRSA area, there were the Slum and Blight areas. I do not see this area in the new NRSA mapping. Are the Slum and Blight area still apart of the NRSA area? What are the AMI focused on for the 45% of housing burdens that was mentioned in the presentation?

Response to Question/Comment 3:

The Slum and blight areas were designated by the City of Detroit and HUD. The slum and blight area was removed from the new NRSA map. We will add the slum and blight area back into the new NRSA map for clarity.

The housing burden really not necessarily related to income, although, what we are finding that lower income households are the ones that are more severely cost burden. There are standards that HUD puts out about how much you should be paying for your household expenses as compared to your household income. We use that data to determine, how many households are and what we would consider cost. Cost burden means a person is spending more than 30% of

their income on housing expenses and they're severely cost burden which is spending more than 50% on housing.

Question/Comment 4:

Question about your survey, how much effort went into possibly surfing the survey to the artist community? Did you have any concentrated efforts go into serving the artists community, young and old?

We have a planned artistic development. How welcoming is NRSA for new development that is affordable housing, provide services and training to the neighborhood?

Response to Question/Comment 4:

The surveys were broadly circulated by all kinds of emails. The District managers reminded people to fill out the surveys and all kind of outreach happen for people to the complete survey. I don't think that we specifically targeted a group like the artist community or artist organizations.

Affordable housing, public service and training are eligible activities. Throughout the five-year period, there are rounds of funding. We encourage you to stay abreast and come to your district meetings to know what's happening. Look on the HRD website so that you could keep up with what those opportunities are and apply when it comes available.

Question/Comment 5:

I have a question in regards to public buildings. We have a lot of abandoned schools in our neighborhoods. I happen to be a member of Third New Hope Baptist Church on the corner of Plymouth and Steel in the city of Detroit. We have an elementary disability school near us that's empty and we have George Parker elementary school across the street from us that's empty. Just wondering how are those funds being utilized or can they be utilized?

I understand the city has taken over the responsibility of the all empty schools. How available are funds to help support plans and ideas and strategies to turn existing facilities into viable repurposed buildings?

Response to Question/Comment 5:

The Department of Neighborhoods (DON's) are now currently doing a study of all of the school buildings to see which one can be saved. A cost analysis for these buildings. The DON's haven't moved to the process of how you buy them. There was a lot of transfers from Detroit Public School (DPS) to the city of Detroit.

Question/Comment 6:

I'm a concerned citizen. I'm also a young person. I like to let you know that on those particular school buildings (elementary disability school and George Parker elementary), I put in a proposal for a recreation center to open up or to get a grant to open up community center. City Council basically brushed me off.

Response to Question/Comment 6:

The Department of Neighborhoods are now currently doing a study of all of these school buildings to see which one can be saved. A cost analysis for these buildings. The DON's haven't moved to the process of how you buy them. The City do not own all school buildings. We have had a lot transfers from Detroit Public School (DPS) to the city of Detroit.

Question/Comment 7:

I have a question about the new boundaries. When can qualified NRSA neighborhoods start applying for funds? Do we have to wait until you submit your application and receive approval? I want to see clearly the zero percent loan NRSA area. Areas were not included before but they're included now. What changed and can we apply immediately?

Response to Question/Comment 7:

There's an application approval process. You will be able to take advantage of the new NRSA area application around December 2020.

If your household is below 80% AMI, no matter where you live in the city, you can apply. You don't have to be in a designated area. Only for neighborhoods that are for residents that are above 80% AMI. So, I don't want to give the impression that you can apply if you're not in an NRSA. You can if you fit within the income limits.

Question/Comment 8:

I wanted to speak about the community development block grant (CDBG). I reside in District Six. I actually had an appointment to complete my application for home repair, because of the street that I live on. Our foundations are cracking due to truck traffic. And it's creating quite a problem with water coming in because street floods and a whole bunch of different other things. So I wanted to know, do I need to remit, a new application?

Response to Question/Comment 8:

Your application was submitted before the pandemic (Covid-19). A HRD home repair Manager will follow-up with the status of your application. You will receive a call tomorrow. Please provide your address and contact information. We will make sure we take care of you and our apologies for the delay.

Question/Comment 9:

I'm a community partner (nonprofit). Can you do urban farms anywhere in the city or are there certain areas allocated for that? I reside in District 7. We have entire blocks that are empty except for a couple of abandoned houses. I also own property in District 4 where I want to do urban farming there too.

Response to Question/Comment 9:

If you are a community partner (nonprofit) you can buy vacant lots. You must get approval from block clubs, neighborhood associations and organizations. Please contact your District 4 and 7 managers about buying vacant lots. In addition, you may contact the Detroit Land Bank Authority to complete an application to purchase vacant lots not adjacent to home.

Question/Comment 10:

I want clarification about the NRSA boundaries. We are looking to put up a Fab Lab for the built environment in Detroit, centered around affordable housing and that will include a summer youth robotics program. I noticed that the SNF and the NRSA designations are close but they're not identical. If we wanted to qualify for a CDBG grant, does that mean we should look for blocks that are in both the SNF and NRSA area? We filed for our 501c3 determination, but have not received is back.

Response to Question/Comment 10:

Information regarding our upcoming workshop will be provided. You are welcomed to attend and register on Eventbrite for the Housing & Revitalization Department second public CDBG NOF workshop on Thursday, September 10, 2020 at 10:00 am

Question/Comment 11:

I reside in District Seven. I had the same interest as questionnaire # 9 (nonprofit), about urban farming. I live across the street from a vacant lot that I wanted to purchase. I would like to provide information to my urban farming on vacant lots purchasing experience.

Response to Question/Comment 11:

Inquiries can be directed to vacant lot manager at the Detroit Land Bank Authority. He can assist will be provided to complete an application to purchase vacant lots, not adjacent to home.

Question/Comment 12:

I live in District Six. I would like to know, how it is that you determine the population size? And who qualifies? I asked because we just found out that part of our district, even though is residential, has been slated by zone as industrial. Part of our population, I don't believe is being counted. I live between the boundaries of Livernois, Tireman, West Warren and Central. I don't think we've ever been included in any of this money and I wanted to know how we can finally be considered?

I'm also concerned about the home repair and the revitalization of our neighborhood. We have a very high number of land bank abandoned homes in our area that have never been demolished. We haven't had any demolition in the last 10 years and they're still standing. We have 17 homes on one block. I wanted to know how we can get in on some of the NRSA as well as other community development block grant money. We have a high number of seniors who have a very poor quality of life around here and nobody is addressing that.

Response to Question/Comment 12:

To determine population, the consultants used the last census information which also includes some residential blocks. Please keep in contact with your District Manager for notices about NRSA and CDBG grant funding opportunities for your residential area. Please complete your Census 2020 form.

Question/Comment 13:

I have a couple of issues that I would like to talk to someone offline in the zip codes 48227 and 48228.

Response to Question/Comment 13:

This information is for you and everybody on the call. To receive information about your home and neighborhood, you can go to the city's homepage and enter your address into the address field. You can report and see your neighborhood issues on this website. The website also provides garbage collection, bulk, recycle, city council, district manager, and your neighborhood police precinct.

Question/Comment 14:

I understand that you can apply online on the city's web page and download the zero percent loan intake form. I also know that applications opened up in March. My question is there a deadline for getting the home repair applications in? And is there a certain number of applications that are being accepted. Is there a threshold?

Response to Question/Comment 14:

This is a continuing home repair open application program.

Question/Comment 15:

I reside in District Seven. I had the same interest as questionnaire # 9 (nonprofit), about urban farming. I live across the street from a vacant lot that I wanted to purchase. I would like to provide information to my urban farming on vacant lots purchasing experience.

Response to Question/Comment 15:

Inquiries can be directed to vacant lot manager at the Detroit Land Bank Authority. He can assist will be provided to complete an application to purchase vacant lots, not adjacent to home.

Question/Comment 16 (received via email):

I am the Housing Resource Intake Coordinator at the Neighborhood Resource Hub at Jefferson East Inc. and was at the online meeting. I have a few questions. Does the Five Year Consolidated Plan Proposal for 2020-2024, as of right now, include any funding for the SER Grant (Senior Emergency Repair)? Is there a current status update for Detroit's SER? How does one get on the waiting list? Is the max amount still \$15,000? Is there currently any funding available? Some seniors that I speak with have extremely low income (0-30% AMI) and would not qualify for the 0% Home Loan, even with great credit and financial counseling.

Response to Question/Comment 16:

There is a waiting list of just under 3,000 people. They can call HRD directly at 313-224-6830 or email HRDHomeRepair@detroitmi.gov. The max amount is \$15,000.00. There is currently funding available, this FY we received \$2.5M in CDBG and \$2.5M in CARES CDBG funding, this is expected to serve around 400 households. We do have Seniors who are around the 30% AMI range that have received 0% loans, I would encourage them to try to apply. In addition, if they have a child under 6 living in the home or visiting the home regularly (maybe they provide childcare?) they are eligible for the Lead Grant. They can call or email to check.

RE: Response to 2020-2024 Consolidated Plan, 2020-21 Annual Action Plan and 2020-24 NRSA

Honorable City Council:

The Housing and Revitalization Department seeks approval to submit the 2020-2024 Consolidated Plan, 2020-21 Annual Action Plan and the renewal of its Neighborhood Revitalization Strategy Area (NRSA) application for years 2020-2024. These two documents will be submitted to HUD for review, pending approval from the City Council. This review by HUD will determine when the City is able to receive its CDBG, ESG, HOPWA, and HOME allocations for the current HUD funding year (2020-2021).

Council Member Castaneda-Lopez posed the following questions to HRD regarding the Consolidated Plan/Annual Action Plan and NRSA geographic boundaries:

Question:

- Can you provide clarity on the block group criteria and the implications on the proposal if the following boundaries were included within the proposed boundaries?
 - The Lonyo-Priest neighborhood (Wyoming to Central north of I-94)
 - Extend the western borders to Wyoming, Oakwood [southwest], and I-96 [northwest]
 - Extend the eastern boundary along Joy and Tireman to the Jeffries Fwy

Response:

It is important to note that the resolution before City Council is for approval of a renewal of the City's NRSA plan for years 2020-2024, which gives HRD very limited ability to adjust NRSA boundaries. A renewal application, rather than a new application, limits the changes the City can propose from the current NRSA plan. During the process of preparing the NRSA renewal application, HRD sought to include neighborhoods known to be occupied by low-to moderate income (LMI)- households to ensure that the program was eligible under federal rules and regulations.

NRSA plans are not frequently used by cities throughout the country, making Detroit somewhat unique in this respect. Compared to other HUD approved NRSA plans, Detroit's NRSA boundary areas are some of the largest in the country. HRD received feedback in July 2020 from Corporate Facts – the main consultant that

has been working with HRD on the NRSA renewal application – that an expansion of the NRSA renewal would be too large to meet the focused intent of a NRSA, putting HRD at risk of not receiving approval from HUD. While boundaries did shift since the last application, they were changed to align with shifting Census Tract borders. When modifying the boundaries, HRD sought to keep the total area consistent with the previous application. Prior to submitting the renewal to Council for review, HRD conducted a 15-day public comment period for the application. If Council chose to modify the proposed 2020-2024 boundaries, HRD would then need to restart the public comment period. Any changes to the geographic boundaries would require an additional 15-day public comment period, and would also trigger changes to the Consolidated Plan, delaying submission and ultimately access to 2020-2021 funding. CDBG funds that support public service activities funded through Grow Detroit’s Young Talent– Summer Youth Jobs program and the Detroit 0% Interest Home Repair Loan program are contingent upon HUD review and approval of the NRSA strategy. These activities fall under the 5-Year Consolidated Plan and Annual Action Plan and the NRSA renewal application, which was brought before the Planning and Economic Development Committee on November 12, 2020. Any expansion of boundaries requested would delay HUD review and approval of the Consolidated Plan, Annual Action Plan, and NRSA application. These delays would push back the date HRD would receive CDBG, ESG, HOPWA, and HOME for the current federal fiscal year and decrease the time HRD would have to spend funds for critical programs prior to the May 2021 timeliness check.

Question:

- HRD held two virtual public hearings and conducted online surveys. Beyond city-wide engagement how did HRD engage community within the target neighborhoods? How did the survey responses and public comments directly impact the Con Plan and NRSA strategies?

Response:

The Department of Neighborhoods, through their neighborhood district meetings, residents and other stakeholders were given multiple opportunities to comment on the ConPlan including NRSA boundaries before, during and after the development of the plan.

District Managers worked with the community residents offering opportunity to address their neighborhood concerns via survey response and direct comments during the community engagements that were directly affected by the NRSA boundaries. HRD were able to make adjustments to the NRSA boundaries to include neighborhoods that became eligible based on the neighborhood demographics according to the HUD regulations.

Question:

- Did ESG resources connected to emergency response funding address the needs that arose during the height of the pandemic? Were the HFWA categories sufficient to meet the need? The Con Plan projects \$12M over the 5-year period, this seem insufficient to significantly mitigate homelessness.

What are the implications on the proposal if more resources were allocated to “eligible ESG activities”?

Response:

Currently, the city has received over \$40-million in ESG, CDBG and HOPWA CARES Act funds to prevent, prepare for and respond to Coronavirus pandemic. These funds are part of the 2019-20 Action Plan amendment that was approved by Council earlier this year (June) and recently (November) to accept and appropriate the funding.

Question:

- What are some of the proposed AHLF programs?

Response:

The Affordable Housing Leverage Fund is a partnership between the City of Detroit, the Michigan State Housing Development Authority (MSHDA), and Detroit Local Initiatives Support Corporation (LISC) (which was selected by HRD to manage private affordable housing investments through the Detroit Housing for the Future Fund). The programs included in the partnership include:

- Gap financing for affordable housing development and preservation (City & MSHDA)
- Low interest loans for affordable housing acquisition and rehabilitation (LISC)
- Preferred equity investment into affordable housing development (LISC)
- Developers of Color Predevelopment Grants (LISC)
- Capital Needs Assessment grants for affordable housing preservation (LISC)

The City and MSHDA will continue to make their affordable housing investments available through the regular release of Notice of Funding Availability releases. Private investments managed by LISC can be accessed by affordable housing owners/developers at www.detroithousingforthefuturefund.org.

Question:

- The Con Plan recognizes 3 “Slum and Blight Areas” as geographic priorities, including Delray. Delray is also recognized within HHF boundaries. What are the implications for layering resource boundaries?

Housing and Revitalization
Department

Coleman A. Young Municipal Center
2 Woodward Avenue, Suite 908
Detroit, Michigan 48226

Phone: 313.224.6380
Fax: 313.224.1629
www.detroitmi.gov

Response:

This will increase opportunities in leveraging resources in that area and to promote future investment that the community will benefit exponentially.

Question:

- No new housing is slated for Delray and the Con Plan only speaks to already existing affordable housing; so then, is this Plan looking to leverage economic development in Delray? If so, what measures are being taken to ensure the residential population is not disadvantaged? To what extent has HRD considered the Bridge development and the jobs creation it will bring to Delray?

Response:

The City of Detroit's Planning and Development Department is currently conducting a planning study for the Del Ray area. The planning study is taking the Gordie Howie Bridge into account, as it relates to future economic development opportunities. HRD will use the planning study as a guide when making future investments in the area. Currently, residents located South of 75 are being offered an option to select a rehabbed home through the Bridging Neighborhoods' Program. Residents North of 75 are being provided retrofits that improve air quality within their housing.

Question:

- Most resources are connected to "eligible CDBG activities". Is it possible to add [sub]categories so other activities are included?

Response:

Yes, as long as the [sub] categories for CDBG activities are in accordance w/the HUD regulations under "eligible CDBG activities"

Question:

- "Proposed Resources for Affirmatively furthering Fair Housing through CDBG" in Delray is limited to Delray United Action project. Is this the only proposed Fair Housing Project over the 5-year term?

Response:

Affirmatively Furthering Fair Housing is not limited to Delray United Action project. The Affirmatively Furthering Fair Housing applies to several other programs that the City has funded including Legal Aid and Defender and Neighborhood Legal Service of Wayne County projects. Also, we have funded Fair

Housing and Revitalization
Department

Coleman A. Young Municipal Center
2 Woodward Avenue, Suite 908
Detroit, Michigan 48226

Fax: 313.224.1629
www.detroitmi.gov

Housing Center of Metropolitan Detroit which will promote Fair Housing awareness for all city residents. Our very own Civil-Rights, Inclusion and Opportunity (CRIO) department has setup a Fair Housing crises hotline and will address fair housing issues throughout the city.

Question:

- HUD's "demographic criteria" is defined as "the designated area(s) must be documented as *primarily residential* and contain a percentage of low-and moderate-income residents that is equal to a community's 'highest quartile percentage' (as computed by HUD) or 70%, whichever is less, in any event, not less than 51%." HRD chose 71%, why?

Response:

The use of the "highest quartile percentage" criteria is based on the fact that some cities may not have a low percent of low-to moderate-income households (incomes 80% AMI or less). So, if a City such as Detroit has its upper quartile percentage (85.8%) at over 70%, the lesser of 70% would apply. For a City that has its upper quartile percent below 70%, the no less than 51% would apply. (See below an excerpt from the HUD Basically CDBG Manual page 10-3, subsection 10.3.1 which further clarifies). Also, the NRSA strategy seeks to create opportunity in distressed neighborhoods by stimulating the investment of human and economic capital and by economically empowering low-income residents.

(Excerpt from HUD Basically CDBG Manual):

The percentage of LMI residents within the neighborhood must be equal to 70 percent of the total population in the selected area (if the grantee's upper quartile is greater than 70 percent of LMI); The upper quartile percentage (if the grantee's upper quartile is greater than 51 percent, but less than 70 percent LMI in the total population); or 51 percent of the total population (if the grantee's upper quartile percentage is less than 51 percent).

Question:

- Existing programs meet a certain demographic, but what if you don't qualify for existing programs; what other programs are in the pipeline?

Response:

The primary objective of the Housing and Community Development Act of 1974 (a) described at §570.200(a)(3) is that not less than 70 percent of the aggregate amount of CDBG funds received by the City shall be used over the period specified in its certification for activities that benefit low and moderate income (LMI) persons (overall community benefit). While the NRSA is used to assist persons above 80 percent of AMI, the overall low-income community benefit must be met. HRD uses the 0% Home Repair Loan Program as a way to serve middle-class households looking for Home Repair funding, households above 80% AMI located in HUD-approved NRSA areas can qualify for this resource.

Housing and Revitalization
Department

Coleman A. Young Municipal Center
2 Woodward Avenue, Suite 908
Detroit, Michigan 48226

Phone: 313.224.6380
Fax: 313.224.1629
www.detroitmi.gov

Question:

- What are the new “qualified block groups” that expanded the NRSA boundaries?

Response:

It will take time to perform a comparison of all 486 block groups, however attached is a map from HRD that outlines the NRSA boundaries from 2015-2019 and the proposed boundaries. Any new block groups included in the map were as a result of meeting the NRSA eligibility requirements for an application renewal including being primarily residential, occupied by 70% LMI households, and overlapping with other city strategies and projects for which the CDBG funding would provide additional leverage.

Question:

- Can you provide clarity on why most projects look to trigger Community Benefits but also trigger exemptions?

Response:

If I am understanding the question correctly, the City is required to expend no less than 70 percent in CDBG for activities that benefit LMI persons (overall community benefit) but the NRSA designation allows activities that benefit non-LMI persons. Notwithstanding the specific NRSA flexibility, the City must meet the overall CDBG community benefit percent.

Question:

- NRSA definitions/criteria rely heavily on Census data; however, the Census doesn't reflect the neighborhood density of the areas north of John Kronk where many new immigrants live. How does HRD plan to account for the gaps in Census data when determining criteria and boundaries?

Response:

The neighborhood and households north of John Kronk will still be eligible for HRD programs through standard program eligibility. HRD partners with several community organizations that serve that area. Those organizations conduct outreach to those areas for programs such as the 0% Interest Home Repair Loan Program, HRD's standard lead hazard reduction repair programs, and provide important community services.

Through the NRSA, HRD is able to expand basic eligibility of some programs. However, it does not restrict HRD's ability to provide all programs to households and residents is not restricted through the NRSA. The

Housing and Revitalization
Department

Coleman A. Young Municipal Center
2 Woodward Avenue, Suite 908
Detroit, Michigan 48226

NRSA does expand eligibility for a limited number of programs. NRSA's may only be designated using Census and American Community Survey (ACS) data provided by HUD unless the City can provide an alternative data source for housing units which method and process are clearly articulated and meet the requirements of the NRSA application.

The Office of Immigrant Affairs assists the Housing and Revitalization Department with information and data that is collected from immigrant and refugee partners including International Institute of Metropolitan Detroit, Islamic Center of Detroit, U.S. Committee for Refugees and Immigrants, ACCESS, Arab American and Chaldean Council and Samaritas. Further, geographic and census data is provided by Global Detroit, Detroit Public Schools Community District, and Welcoming Michigan. The Office of Immigrant Affairs also engages with the City of Detroit's Immigration Task Force to identify community needs and gaps in services.

Respectfully submitted,

Donald Rencher

134 dogs, some in poor health, seized from U.P. puppy mill

Chanel Stitt Detroit Free Press
Last Updated: 8/25/20

A police call for a horse in the road turned into a puppy mill bust involving 134 dogs in the Upper Peninsula.

The dogs were retrieved by the Michigan State Police, Delta County Sheriff's Department and the Delta Animal Shelter from a residence in Maple Ridge Township of Delta County.

Here's what the Michigan State Police reported: "Troopers arrived to find scores of the dogs in poor health and malnourished. They retrieved 65 adult dogs and 69 puppies, which are now being evaluated and cared for at the Delta Animal Shelter. Many of the dogs were pregnant, or had a recent litter of puppies."

The Delta Animal Shelter has received an overwhelming response about the puppies

and dogs that they received, said the shelter on Facebook.

"We will be putting out a request for foster, builders, walkers, socializers, cleaners, toward the end of the week," said the shelter. "These poor pups are so scared."

The post goes on to state: "At this time we are focusing on getting them medically cared for. They are all going to be just fine and we promise they are on their way to such a better life. No dog should ever live that way ever."

The shelter told UpNorthLive that the dogs include yellow, black, white, chocolate labs, Golden Retrievers, pit bulls, golden retrievers, Australian shepherds, Australian shepherds, rottweilers, German shepherds, Yorkies, teddy bears, pit, Chihuahuas and Boston terriers.

Possible criminal charges for the puppy mill owner are under consideration by the Delta County Prosecutor's Office.

MICHAEL E. DUOGAN, MAYOR CITY OF DETROIT HOUSING AND REVITALIZATION DEPARTMENT

VIRTUAL COMMUNITY PUBLIC HEARINGS FOR THE 2020-2025 COMMUNITY DEVELOPMENT BLOCK GRANT/NEIGHBORHOOD OPPORTUNITY FUND (CDBG/NCOF) PROGRAM

The City of Detroit has two community organizations and others to submit proposals for projects to be funded by the 2020-2025 Community Development Block Grant/Neighborhood Opportunity Fund (CDBG/NCOF) program.

All community organizations, human service organizations, non-profit organizations etc. who wish to participate in the development and implementation of CDBG/NCOF as sub-recipients and/or as operating agencies may submit proposals.

This year, all 2020-2025 CDBG/NCOF proposals must be prepared and submitted online using the City's "Track" system. Proposal applications must register on Oracle before a proposal can be submitted. Proposals must be submitted to Oracle by **4:00pm on Friday, December 4, 2020**. Paper copies of Proposals will not be accepted. To obtain information regarding Oracle, please visit the City of Detroit Office of Contracting and Procurement website.

Proposals submitted by the **Friday, October 2, 2020** deadline will be reviewed by city agencies. Late proposals will not be accepted. Funding approval for proposals will be determined by the Mayor and City Council.

The 2020-2025 CDBG/NCOF proposal packages with the required proposal forms will be available in Oracle on **Wednesday, September 2, 2020**.

VIRTUAL CDBG/NCOF WORKSHOPS

The Housing and Revitalization Department (HRD) will conduct two CDBG/NCOF "Proposal Workshops" to present details and answer questions regarding Neighborhood Opportunity Fund (NCOF). The workshops will be held as shown below:

Virtual Workshops	
Proposal Workshop 1	Wednesday, August 16, 2020 @ 10am
Registration Link:	https://www.aon.com/events/611552044592/
Proposal Workshop 2	Thursday, September 10, 2020 @ 10am
Registration Link:	https://www.aon.com/events/611552044591/

Workshop registration information can be obtained by visiting HRD website <http://www.detroitmi.gov/hrd>

Workshop materials will be available on the City's website at <http://www.detroitmi.gov/hrd>. From there click on, "For Neighbors and Community Groups" and **Virtual Community Public Hearings**. The workshops are designed to help community groups and others prepare their CDBG/NCOF proposals. According to proposal criteria, a community group representative must attend an evening workshop to be eligible for funding (see proposal signature page).

CONSIDERED PLAN

The HUD Consolidated Plan is a five-year strategic plan, updated annually, describing the needs, conditions, objectives, priorities, strategies, and action programs related to community development, affordable housing, the homeless, and housing for persons with special needs, including persons living with HIV and AIDS. The plan is required so the City may receive funds from certain HUD programs. The plan contains the annual funding applications for the following HUD programs:

- Community Development Block Grant (CDBG)/Neighborhood Opportunity Fund (CDBG/NCOF)
- HOMES Investment Partnerships (HOMES)
- Emergency Solutions Grants (ESG)
- Housing Opportunities for Persons With AIDS (HOPWA)

The City's last Consolidated Plan covered the period from 2015-2020. The City is in the process of preparing the 2020-2025 Consolidated Plan and the Neighborhood Reinvestment Strategy Area (NISA) renewal.

There will be six virtual community public hearings held to obtain citizen input necessary for the Consolidated Plan and NISA development. This year the meetings will be held as shown below:

Public Hearings 1	
Tuesday, August 25, 2020	6:00 PM – 8:00 PM
Registration information can be obtained by visiting	www.detroitmi.gov/hrd (click on HUD Consolidated Plan)
Public Hearings 2	
Wednesday, September 23, 2020	6:00 PM – 7:00 PM
Registration information can be obtained by visiting	www.detroitmi.gov/hrd (click on HUD Consolidated Plan)

During the public hearings, HUD staff will describe the contents of past plans and the types of activities that may be undertaken using program funds. Also, our consultants will present the citizens survey results and the new NISA boundaries for the NISA renewal application to HUD. Hearing participants will be given the opportunity to ask questions and present their opinions regarding Consolidated Plan provisions and activity types that can be included in the Annual Action Plan. The hearing will focus on these matters, and is not held to discuss funding for particular organizations. Citizens may also submit comments by email at ConfPlanComments@detroitmi.gov on or before October 15, 2020. This notice will be posted on the City of Detroit website at <http://www.detroitmi.gov/hrd> from there click on, "Archival Reports/Newsletters."

For further information, contact:

Terri F. Hardy
Housing and Revitalization Department
250 Woodward Avenue
Detroit, MI 48226
Telephone: 313-224-0262

Participants with disabilities who require special accommodations, such as sign, voice, or web-based to participate in these hearings, should contact the Housing and Revitalization Department. Reasonable and accessible means of such needs is required.

Notice of Non-Discrimination: The City of Detroit does not discriminate on the basis of race, color, creed, national origin, age, handicap, sex or sexual orientation. Complaints may be filed with the Detroit Human Rights Department, Coleman A. Young Municipal Center, Detroit, Michigan.

U-M president acknowledges trust issues on campus

David Jesse Detroit Free Press
USA TODAY NETWORK

From the campus community in his leadership, even as he pledged to rebuild it.
"I really feel stronger and stronger an emotion of trust across the campus and I'm looking for ways to rebuild the trust so we can

tap into our unity and the institution," said Schilbold, speaking on a special town hall-style broadcast. "What I'm going to do is more of what we just did. There are many perspectives across campus. I need to do more communicating with different types of people to understand the collective vision. The thing I walk away from this with is the value of listening."

The broadcast featured Schilbold and U-M Provost Susan Collins, the university's chief academic officer, both answering questions from Scott Page, a faculty member in the College of Literature, Science, and the Arts and Stephen M. Ross School of Business.

It comes as U-M finds itself in turmoil. The union representing graduate student instructors and assistants is entering the second week of a strike, as are student residence hall workers. Faculty are poised to consider a no-confidence vote against Schilbold on Wednesday afternoon for his handling of return-to-campus plans. Football players, coaches — including head football coach Jim Harbaugh — player families and fans are critical of Schilbold for wanting to suspend the Big Ten football season.

Students are upset about poor conditions in quarantine housing and about a new accepted plan to send annual police officers into off-campus student housing neighborhoods to enforce no-party policies.

Page asked pointed questions repeatedly throughout the town hall event, including asking the duo — the university's highest ranking administrators — about why students and faculty came back to campus this fall to find no significant work done or projects ready to go on

issues of systematic racism.
"We deserve that criticism," Collins said. "We were slow."

Schilbold offered a defense of that slowness, saying that with all the work of figuring out how to restart the semester, those issues got "crowded out."

Page also questioned why the university brought students back to campus for classes, even as about 80% of undergraduate classes are being offered online.

Equity issues, Schilbold replied.
"There is a real equity issue while fully remote," he said. "Not all students are just living in town and having a good time. We are also providing resources like internet and a safe environment for students who need that in addition to an education."

Schilbold did not say he made a mistake in getting students back to campus, but said he would have changed his approach.

"One of the errors that I made was that I took a very expert-focused approach that became narrow," he said. "If I had it to go back I would take a broader, more inclusive approach that factored in the health of university life."

Page ended the event by recalling how he came to U-M as a student decades ago from a small town and how it had shaped who he became.

"I care deeply about this place. It's on you to keep it going."

University files injunction to bring halt to strike

Slova Terranella Detroit Free Press
USA TODAY NETWORK

are GEO's members interfering in the university's mission to educate students by unlawfully withholding their labor, they are encouraging unreasonable undergraduate students, over whom they exercise significant authority, to forgo their education."

The University of Michigan filed a complaint and motion in Washington County Circuit Court on Monday, seeking the Graduate Employees Organization to return to work.

U-M is seeking a temporary restraining order and preliminary injunction against the graduate instructors union strike. On Sunday, 80% of union members voted to extend the strike, which started on Sept. 8, for another five days.

"Going to the court was our only choice after learning the strike would continue. We'd much rather our classes be in session while we work out our differences," U-M President Mark Schilbold said in a video.

If the court grants the injunction, GEO members — who refuse to work — could be held in contempt of court, according to a university statement. The group could also face civil damages because of the strike, which violates the union's contract with U-M.

The union released a response statement on Monday saying no individual member is at risk because of the injunction and the group knew legal action was a possibility.

"We're disappointed that President Schilbold has chosen to immediately abandon these practices in favor of trying to shut down our strike by brute force," the statement said. "What is the University of Michigan for using their immense resources to bully their graduate workers out of striking — instead of using those same resources to create a safe and just campus for all?"

According to the U-M court filings, "Not only

On Sept. 8, the university also filed an unfair labor practice charge against the union through the Michigan Employment Relations Commission. This demands the union "cease and desist from unlawfully striking or conducting a work stoppage against the University of Michigan."

U-M spokesperson Rick Fitzgerald said there's been no ruling on either case yet.

The union is demanding better transparency for COVID-19 testing, a universal remote option to work, child care subsidies, a repeal of the \$500 international student fee and a demilitarized campus.

The group is also asking for more graduate student support through bigger stipends, car allowances and funding, a \$2,500 emergency grant, rent freezes and flexible leases for on-campus housing, according to GEO's website.

On Wednesday, U-M faculty will vote on a motion of no confidence regarding the university's reopening and COVID-19 plan, according to the Michigan Daily.

U-M currently offers a mixture of face-to-face and remote classes for students. Twenty-two percent of undergraduate credit hours are being taught with all-in-person components, according to university officials, and three-quarters of graduate students are teaching remotely.

2020 - 2024 HUD Consolidated Plan/ Annual Action Plan and Neighborhood Revitalization Strategy Area (NRSA)

The City of Detroit will hold 2 joint virtual public hearings with the Department of Neighborhoods on the 2020-2024 Consolidated Plan/2020-2021 Annual Action Plan and NRSA (renewal) for community residents, organizations and stakeholders.

The City of Detroit invites all community organizations, neighborhood residents, business organizations and other stakeholders, who wish to participate in the development and implementation of the U.S. Department of Housing and Urban Development (HUD) 2020-2024 Consolidated Plan/2020-2021 Annual Action Plan and Neighborhood Revitalization Strategy Area (NRSA) renewal.

Background

As a jurisdiction that receives funding directly from HUD, the City of Detroit is required to develop a Consolidated Plan to inform its use of annual HUD funds, which include the following four programs:

- Community Development Block Grant/Neighborhood Opportunity Fund (CDBG/NOF)
- Emergency Solutions Grant (ESG)
- HOME Investment Partnership
- Housing Opportunities for Persons With Aids (HOPWA)

Districts 3 and 4 Virtual Meeting

Meeting ID: 939 4789 4155

Call in option: (312) 626-6799

Districts 1, 2, 5, 6 & 7 Virtual Meeting

Wednesday, September 2, 2020
6 - 7 p.m.

Join via ZOOM

<https://cityofdetroit.zoom.us/j/96649691345>

Meeting ID: 966 4969 1345

Call in option: (312) 626-6799

Meeting Outline

- Overview of the Consolidated/Annual Action Plan including funding allocations
- Community residents, organization, and stakeholders survey results
- NRSA past accomplishments
- NRSA renewal new boundary areas

Attachment H: NRSA Monitoring Checklist

Guide for Review of a HUD-Approved Neighborhood Revitalization Strategy Area (NRSA)			
Name of Grantee:			
Staff Consulted:			
Name of NRSA:		Date of HUD Approval:	
Five Year Period of Time Covered by Approved NRSA Strategy:			
Name(s) of Reviewer(s)		Date	

NOTE: All questions that address requirements contain the citation for the source of the requirement (statute, regulation, NOFA, grant agreement.). If the requirement is not met, HUD must make a finding of noncompliance. All other questions (questions that do not contain the citation for the requirement) do not address requirements but are included to assist the reviewer in understanding the participant's program more fully and/or to identify issues that, if not properly addressed, could result in deficient performance. Negative conclusions to these questions may result in a "concern" being raised, but not a "finding."

Instructions: This Exhibit is to be used in conjunction with the eligibility and national objective Exhibits for activities undertaken in the NRSA. One Exhibit is to be completed for each NRSA monitored.

Questions:

1.

a. Has the grantee received from HUD separate written approval for each NRSA, either as part of, or separately from, the Consolidated Plan approval process?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

b. What is the approved start date of the NRSA? Are NRSA activities being undertaken within the operational term of the NRSA (maximum five (5) year operational period)?	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Yes No N/A
Describe Basis for Conclusion:	

c. Are the NRSA boundaries contiguous with or within other pre-approved place-based planning areas as stated in CPD Notice 16-16?	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Yes No N/A
Describe Basis for Conclusion:	

2.

a. Has the grantee continued to identify and involve stakeholders? Are stakeholders made aware of the NRSA's progress, planned activities and new investments that may be taking place in the neighborhood or its periphery?	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Yes No N/A
Describe Basis for Conclusion:	
b. Do the stakeholders identified as involved include: <ul style="list-style-type: none"> • Affected residents of the proposed NRSA? • Affected public and assisted housing residents? • Owners and operators of businesses? • Financial institutions? • Community-based development organizations (CBDOs)? • Nonprofit organizations? • Community groups in or that serve the neighborhood? 	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Yes No N/A

Describe Basis for Conclusion:			
c. Have public hearings been held at least annually regarding the NRSA?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

3.

a. Is the grantee accurately identifying in IDIS activities that are being carried out in an NRSA? [24 CFR 570.507(d)]	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

b. Is the grantee developing housing based upon its approved NRSA strategy? Review the originally proposed goals and activities identified for housing against the accomplishments reported in the PR84 Report, IDIS accomplishment detail screens, and in the CAPER(s).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

c. Is the grantee creating/retaining jobs based upon its approved NRSA strategy? Review the originally proposed goals and activities identified for economic opportunities against the accomplishments reported in the PR84 Report, IDIS accomplishment detail screens, and in the CAPER(s).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

d. Is the grantee providing employment opportunities to the targeted population(s) it identified within the NRSAs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A

Describe Basis for Conclusion:

e. Is the grantee providing the supportive services it identified for the NRSA?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A

Describe Basis for Conclusion:

f. Has the grantee ensured that its CDBG funds are spent in the NRSA in coordination with other public and private resources?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A

Describe Basis for Conclusion:

4.

Note and describe below which of the following incentives the grantee has taken advantage of in implementing its Strategy:

- Job creation/retention as a low- and moderate-income area benefit?
- Aggregation of housing units?
- Aggregate public benefit standard exemption?
- Public service cap exemption by CBDOs?

Describe Basis for Conclusion:

5.

Is the grantee accurately reporting the incentives it is using in IDIS and in the PR26 Report? [24 CFR 570.507(d)]	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A

Describe Basis for Conclusion:

6.

a. Has the grantee documented leveraged resources received and used to support the NRSA, in addition to HUD grant funds?
Yes No N/A

Describe Basis for Conclusion:

b. Are the leveraged resources documented as cash and/or in-kind resources in the CAPER and in IDIS?
Yes No N/A

Describe Basis for Conclusion:

7.

Is the grantee annually reporting its progress in achieving the benchmarks at the end of each program year in the CAPER?
[24 CFR 570.507]
Yes No N/A

Describe Basis for Conclusion:

8.

a. Is there any evidence that the grantee's progress in implementing its NRSA is substantially lagging behind expected projections?
Yes No N/A

Describe Basis for Conclusion:

b. If HUD has suspended approval of this NRSA, is there any evidence that the grantee has continued to take advantage of the regulatory incentives during the period of suspension? If so, provide the regulatory incentive that the grantee is still taking advantage of and state whether the grantee is, therefore, violating a program requirement. Refer to CPD Notice 16-16 for the regulatory citations for
Yes No N/A

all of the incentives and cite the appropriate regulation as a basis for any finding. Do not cite CPD Notice 16-16 as a basis for any finding.	
Describe Basis for Conclusion:	

9.

If the Strategy has been amended, has the grantee met the criteria for the amendments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:			

10.

Is the grantee implementing its Strategy as approved by HUD and in accordance with civil rights-related program requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Yes	No	N/A
Describe Basis for Conclusion:
