JULY 27, 2020

SCOPE OF WORK

**Y1801 – Beer Exchange Detroit
HDC Review 4 (Internally Lite Blade Sign)**

- The following Scope of Work applies to the Detroit Beer Exchange as shown on the HDC Project Review Request form dated 7-21-2020.
- The proposed work is part of a new restaurant within the basement and first level of the existing Stevens Building on 1258 Washington Blvd.
- We propose installing an exterior blade sign (sign-c) on the North-West corner of the building. This sign will be internally illuminated, not externally illuminated. It will be attached to the existing building limestone panel façade. It will be made of acrylic faces with full color graphics.
- Sign-C is noted on our architectural drawings from the last HDC Review 3, dated 6-10-2020. Sign-C is also known as Blade Sign-A by Spectrum.
- Existing building conditions along with new sign, color and materials are noted on drawing and photos from the signage contractor, Spectrum Neon Signage. For added job description by the sign contractor refer Spectrum letter dated 7-27-2020.
